O'Brien-Zurch Fast Baseball Fight to Draw at Morningside

The fight held in the local arena on Thursday night last was a real one. Although the crowd was not as large as expected, what was lacking in numbers was made up for in enthusiasm. Every boy on the card was outstanding in every way. From the curtain-raiser which Kid Slater won to the Main Event that went to a draw, the fans present got their money's worth and then some. The rains of Wednesday and Thursday undoubtedly kept many away from the fight, but loads of fight fans from as far north as Wetsakwin, and East as far as Bonanza, South from Inland and West from Rimbey were in attendance. Tom Gravelly, referee, handled the fight to the entire satisfaction of both fans and fighters.

The main event was a fight of the highest order. O'Brien and Zurch were both in the very pink of condition and fought through the entire ten rounds of the match to a draw. This match was clean and fast and both men displayed plenty of clever work. It was apparent from the start of the bout that O'Brien was the favorite with the fans. Zurch came in for a lot of applause for his nice fighting. There was not a knock-down in this bout and taking it round for round, the decision of Gravelly was the correct one. Each fighter showed respect, but not fear for the other. Zurch has one of the best left hands in the game, but O'Brien excelled on the parry and counter punch and had Zurch a box on several occasions. As the fight went into the final rounds Zurch's nose streamed blood, and he was visibly weakening, but he showed great heart and courage that was deserving of applause. The fans and clean fighters of both contestants and the verdict of a draw were heartily cheered by the crowd.

It was somewhat of a surprise to the fans that Gordon McGovern won the decision over Pete Holm. Pete was favored to win this bout and he certainly tried hard. He was up against an exceptionally fast man, however, and to loose to McGovern after fighting him for eight rounds is certainly no disgrace. Naturally, fans of Lacombe wanted to see Pete win his match, as he is a favorite, both in the ring and out of the ring. These two men fought a draw at Clive last month, and fans looked for either a draw this time or a win for Pete. In the first round of the bout, Pete landed a lot of hard ones and it looked like his fight, but McGovern showed plenty of action to the end of the bout. All the fans hoped for a draw, but McGovern got the decision. We are sorry Pete lost, but it was a real fast, clean fight.

Benny Tait and Baden Whiteides fought to a draw in their sixth round match. This was a nice match with lots of speed and plenty of hard hitting. Baden seemed to be forcing the fight most of the time, but Benny covered up well and Baden's heavy hitting did not seem to have much effect. Baden's left jab and straight right hands to the head and body kept Tait ducking and blocking to protect himself. Tait deserves praise for his skill and courage in staying the limit with his larger and very clever opponent. Whitesides has fought some of the best boys in the game, and on several occasions challenged Pat O'Brien. Both men are splendid sports and the decision of a draw went over big with the fans.

Bob Jones of Gadaby won from Geo. Davis, Lacombe, in their 6 round preliminary. This was a great bout to watch. Davis has not had much ring experience, but put up a real battle. Jones deserved his win. The fastest bout on the card was between Don Wells of Red Deer and Johnny Zurch, of Edmonton. Don Wells has fought here before and is a fast little fighter. This was Johnny Zurch's first appearance here and fans got lots of action in this bout. Don Wells was the aggressor in the opening rounds, but it did not take Zurch long to bring the bout back to business, and he did plenty of boxing in the closing rounds. Fans were all enthusiastic over this bout. The decision of a draw was popular.

Denver Kid and his Red Deer opponent fought to a draw. This bout was fast and both fighters worked hard, so hard in fact that they both knocked each other down at the same time. Fans got a kick out of this battle.

Kid Slater won his bout over Tom Ford. These two boys are both popular with the crowd and went in to win.

Pat O'Brien will fight Baden Whitesides at Grande Prairie on July 1st.

Harry Teare, who was official announcer handled this job to perfection. His announcements were clear and distinct and could be heard from all parts of the arena.

In an exceptionally fast game played at Morningside on Friday night, Morningside won by a very small margin, the score being 3 to 2. A large crowd attended, many coaches going up from Lacombe. All who saw the game say it was one of the best games played this year. As the league is approaching the halfway mark, all teams are stepping faster, and there should be lots of exciting games in the future. The boys played great in the Friday night game, and with a little bit of luck would have put the game away. Morningside has a really fast lineup.

Rimbey will be here on Friday night, so a good game is anticipated. It will be remembered by baseball fans that Lacombe swamped Bentley 12-4 in their last game there. From reports received from the west, the Bentley team has hit its stride now, and a good game is promised. You should not miss this game, as the boys need your support, and besides you will see a fast game.

BLACKFALDS WINS FROM MORNINGSIDE

And did they win—we ask you? Despite the fact that Johnny Bennett was taken in from the outfield to pitch, owing to the absence of the regular twirler, Blackfalds romped away from Morningside to take the league fixture Tuesday night by the one-sided score of 7 to 1. In an interview with the Blackfalds manager after the game, the reporter was informed that fans did not know the half of it, and that the team could have beaten Morningside even worse, only they wanted to make a game of it. He also implied that the run that Morningside got in the first frame was given to them so that they would not get discouraged. However, he said that as it may, Morningside played a good game under the circumstances. What Johnny had on that ball nobody knows, it just seemed to dodge the bat, or loop around it. And speed, well, when that ball came down the groove it looked like a marble and the bats didn't seem to be half big enough. Hank McLennan who was receiving for Blackfalds, says he would give the signal and put his mitt out, and "presto" the ball would be there without him even seeing it. When Morningside did manage to connect (with a slow one of course), there was always a fielder under the ball when it came down. About the middle of the game, Johnny (Babe Rath) Bennett came up to the bat, and naturally, all the Morningside fielders backed away out to the tracks, but that made no difference to Johnny, he just picked out a good one and smashed out a home run. And how he hit that ball! Spent his whole life at that ball, he said in an interview, that he knew Blackfalds had a real ball team, but had no idea they were that real. He is confident that his team will reverse the score next week. Well, fans, when these two teams come together again, be at the game—you'll see a real ball game.

DEATH OF MRS. J. W. WILTSE

On Friday evening, June 23rd, Mrs. Joseph Wiltse, passed away in her 68th year after a lingering illness. Born at Litchfield, Minn., Grace Wheeler was united in marriage with Joseph Wiltse, on June 21st, 1904, at Larimore, N.D., and eight years later, they came to Lacombe, where they have since resided. A devoted wife and mother and an active church worker, the deceased was highly respected and loved by all who knew her. Her mother who spent her declining years with Mrs. Wiltse and who had attained to over ninety-two years of age, predeceased her five years ago.

Including her husband, she leaves to mourn, two daughters, Mrs. A. Robertson, Clive; Mrs. Hugh Hanna, Blackfalds; and two sons, Wheeler and Donald, at home; a sister, Mrs. M. W. Wallace, New York City and a brother, J. Wheeler of Malta, Mont. Funeral services were held from the family residence in Lacombe, on Sunday, June 24th at 3:30 p.m., Rev. T. H. Chapman, of St. Cyprian's Church, officiating.

Rimbey is putting on a big celebration on Friday night. There will be wild west events, horse races, girls and boys races, bicycle races, ball games, etc.

Season Opens at Gull Lake

With lovely weather over the week end, many people from all points in the province visited Gull Lake. All available camping spots were taken up by tourists. More tourists have stopped at Gull Lake this year, than in any other year on record to date.

At a meeting of the Gull Lake Sports Club, held last Monday night in the "Cozy" hall, it was decided to hold a "dance in Fernie's Hall, to raise funds for sport equipment. Mrs. Fernie kindly donated the hall, and a local orchestra donated their services.

The largest pile caught this summer was pulled in on Sunday. The measurements were: length 39 1/2 inches; weight 11 1/2 lbs.

The Gull Lake Sports Club are endeavoring to bring the out-board motorboat championship races to Gull Lake this summer.

The following are registered at the Tourist Resort Hotel: J. Arundell, Calgary; Mrs. Thompson, Miss Cairn, Lacombe; Mrs. Law and family; Mrs. Coutes and family, Ponoka; Mrs. Snell and family, Edmonton.

Tom Lorimer is now open for business at his old stand "The Cottage Store" which is centrally located. He has a large stock of camper's supplies, shell hardware, groceries, etc. Tires can be repaired at this place, and free air is there if you require it. Tom carries oils, greases, gasoline, and minor repairs for your car and is there to serve you. For anything you require while at the lake, call around to the cottage store and if it is not in stock, Tom will be pleased to get it for you.

The Portune-Cup-Inn tea room, is now open, in its second year at the beach. This tea room is ideally situated, overlooking the lake, and is under the same management as last year. Lunches are served at all times, and your fortune will be told by tea-cup-reading at no extra charge. Those who have visited the tea-room in the past will need no urging to do so this summer. New covers should not fail to visit this lovely tea-room. A few rooms are available at a minimum cost.

The following Edmonton families are at the beach at present: Mr. and Mrs. F. Muir; Mr. and Mrs. A. Agnew; Mr. and Mrs. G. McKay; Mr. and Mrs. Macdonald; Don Baker; Mr. and Mrs. C. Blackett; Robt. and Barbara Blackett; Mrs. C. May; Prof. and Mrs. J. Cook and family; Mr. and Mrs. G. Baker and family; Mr. and Mrs. K. Kim; Mrs. C. Macpherson; Mrs. J. L. Studholm; Dr. and Mrs. S. Archibald and family; Mrs. A. Davis and family; Mr. and Mrs. McNab; Mrs. F. Fisher and Frances. Calgary visitors at the beach: Mr. and Mrs. J. A. Gerald; Miss H. Rimmer; Mrs. A. Hopkins; Mrs. F. Young; Mr. and Mrs. W. Whitmore and family; Mr. and Mrs. R. Ward and family; Mrs. R. G. Bakirk and family. Other points: Prof. and Mrs. R. McQueen and family; Saskatoon; Mr. and Mrs. T. Chandler and family, Ponoka; Dr. and Mrs. H. E. Halpin, Rimbey.

New Youth of Canada

Some thousands of Canada's young men and women have just been turned out of the schools, colleges, and universities of the Dominion, and, for the time being at least, have joined up in the country's largest standing army of "the unemployed."

It is estimated that not more than ten per cent. of the total number of yesterday's students who now are ready, willing, and anxious to earn a living have jobs to go to or an opportunity in sight of pursuing their chosen professions.

While there are grounds for the belief that the world is moving gradually toward a solution of some of its economic problems and that improved conditions sooner or later may result, the businesses of the country which in times past generally have absorbed large numbers of outgoing students are not yet in a position to create jobs. For the most part they have laid off thousands of technical and other trained workers and there are at the moment no openings as candidates for positions.

Nor can the doctors, dentists, lawyers, architects, and others in the

THURSDAY, JUNE 29, 1933

Consolidation of Taxes

For the purpose of encouraging property owners to liquidate any arrears of taxes, and also to give better opportunity to those whose lands may have passed under the Tax Recovery Act, to retain title or at least protect their property from sale, the provisions of the new Tax Consolidation Act, passed at last session of the legislature, have been brought into effect, and may be taken advantage of, according to announcement from Edmonton.

The Act provides for arrears of taxes of more than a year's standing as at the beginning of 1933, to be consolidated, and payments made in six annual instalments, each to be paid not later than December 15 in each year. The first instalment is to be 10 per cent. of the consolidated arrears, the second instalment 10 per cent, the third 15 per cent, the fourth 20 per cent, the fifth 20 per cent and the sixth 25 per cent.

Those wishing to avail themselves of the advantages of the Act must apply in writing to the Municipality before October 1. Owners of land whose taxes were consolidated under the act of 1931 and 1932, may come under the new act by making application up to October 15. The instalments collected under the new system will be pro-rated among the taxing authorities involved.

The new act provides also for certain discounts on the payments of the instalments of arrears, as follows: For arrears of six years and more, 25 per cent, five years, 22 per cent, four years, 18 per cent, of three years, 14 per cent, and of two years, 9 per cent. These discounts will be computed, not on the total amount of the consolidation, but separately on each class of tax involved. That is, if the portion of the consolidated amount which is due on supplementary revenue is in arrears for six years, then the 25 per cent applies, but if that portion of the total which applies to another class of tax is in arrears for only four years, then it would receive only 18 per cent discount, and so forth. The act also provides that the property is at present under the tax recovery act, by permitting them also to make an agreement to pay up arrears under the new act, and on completion of all the requirements of the agreement, applies to owners of two acres or more. A special discount of 4 per cent is allowed those who can pay the entire consolidated sum in one payment, this discount being computed on the net amount of arrears due, after the other discounts have been deducted.

These "bright and promising young people" have views with a critical eye on the shattering devices and demolished theories, once held to be inviolable in the realms of finance, industry, and politics. They are keenly alert to the truth which is obvious to everyone, namely, that a serious gap exists between physical science on the one hand and the social and political sciences on the other.

One vocational authority who has been studying the young colleges of today and watching the staggering increase in the number of students, declares: "He is a sounder proposition and a greater asset to his country than his elder brother."

"They have no illusions about 'big business,'" says another, "no fear of its bogies; no awe of corporate interests, amalgamations and mergers; nor any belief in the sophistries of people wealthier than themselves. And they are talking things over with each other rather than consulting those who have been tracing old patterns instead of designing new ones to solve our troubles."

And so our young people are preparing themselves for participation and leadership in a new or revitalized order of human affairs not only in Canada but throughout the world, and are pleased to call civilization. They are interested in things that really are vital.

SUNSET W.I.

A very pleasant afternoon was spent by the ladies of the Sunset W.I., on June 21, when they met at the home of Mrs. S. Brooke. A number of visitors were present and fifteen members responded to the Roll Call by describing their choice of a Bridal costume.

Mrs. Brooke was chosen to be official delegate to the W.I. conference held in Rimbey, July 2nd, Mrs. Simons, of Chapel W.I. read an interesting report of the conference of Alberta Women's Institute which was held in Calgary in May. Mrs. George Graham, of Bentley demonstrated the making of attractive vases from old bottles and jars by painting. After a tasty lunch served by the hostess the meeting adjourned.

SPRING VALLEY

On Wednesday afternoon, June 21, the ladies of Spring Valley held a very pleasant surprise and shower for Miss Mayo Dooley, a bride-to-be. Many lovely presents were received. After lunch the guests departed for home, all precluding an enjoyable time.

What Will Conference Accomplish?

World Economic Conference in London. Representatives of all nations specializing; giving out messages of hope to men and women, for the past three and a half years have seen wealth, security and happiness disappear, as if by magic. Has this conference any significance? Has it more significance than any one of the scores of other conferences which started thirteen years ago at Versailles and have continued since then at Geneva, Arlington, London, Paris, Rome, London, Washington, Ottawa, Washington and again at London?

War debts, monetary stability, tariff walls and many other vital issues will be discussed before the conference delegates. Each delegate publicly will record his government's favoring anything to re-establish confidence in the existing social, political and economic order, but what goes on behind closed doors? After the public declarations, when do the battles, strategic lobbying, diplomatic threats, conspiracies and collusion. Each delegate forgetting his noble sentiments in an effort to secure the edge on concessions for his own nation. The common end, world prosperity lost sight of the struggle for national perquisites.

Throughout the conference: delegates performing miracles in industry. Pulling teeth out of resolutions which, if left alone, should bite into the fundamental crust of the world's economic disease, and those teeth which are overlooked in the hurry and scurry of committee work will be extracted by various governments before ratification.

Is this a cynical, jaundiced view of the World's Economic Conference? Please refer to list of resolutions passed at Geneva in the past thirty years. International disarmament, health, labor laws, sufficient to keep the world afloat for the next century, and enforcement of these out of the question, the political consequences are too far-reaching, too all embracing.

But to return to this latest conference, called out of sheer desperation by governments, nations, under monetary instability. Read the idealism contained in the opening speech, and then read between the lines as this nation, or group of nations, jockeys for representation on this or that committee. Note how Europe gangs up against the United States on war debts and how the United States gangs up with other nations to boss the show on gold devaluation.

Ole Boode Will Start Operations

Mr. Ole Boode, automobile magnate and general dealer, who at present makes his headquarters at Red Deer, was in town again this week making preparations for the commencing of work on his new auto camp and service station. Mr. Boode owns twenty-five acres of land facing on Main St., just off Oliver Avenue, and this property is ideally situated for his scheme, which in addition to an up-to-date service station and camp cottages, will include a swimming pool, and will be a boon to the motoring public. In connection with a reporter of The Western Globe on Monday, Mr. Boode was most enthusiastic over the improved conditions throughout the country. He reports business rapidly getting back to the good old times, and is confident that now is the time to be busy and take advantage of the change in conditions. Apparently "Ole" did not lose all his timber holding in the Kreuger crash last year, as he reports having sold a valuable parcel this week. While he expresses sorrow at the downfall of his fellow countryman, he says he was not surprised, as he had on many occasions advised the great financier to invest his money in Central Alberta, where you can't lose.

Mr. Boode is following with great interest, the progress of the deliberations at the World's Conference in London, Eng. Up-to-date, he thinks the conference has done very little to settle the world's problems, but has great hopes that some good will come of the conversations, and humanity in general will receive some benefits for the money the conference is costing. Something must be done he says, to give everyone a chance to live and prosper, and not have nine-tenths of the people depending on the generosity of the big money interests. You know, he remarked, "The survival of the fittest" was at one time considered a good thing, but now it has been changed to "The Survival of the Slickest."

The Threat of Prosperity

A friend of ours once made the remark that the world was divided into two types of persons—the persons who hoped the depression would end and the person who was afraid it would end before he had time to put his pet theories into effect. Therefore, when we suggest that from one point of view one of the most unfortunate things at the present time is the general price recovery and re-awakened industrial activity of the United States, we feel that we fall into the latter category.

Yet, on second thoughts, it really doesn't matter if we do. After all if the depression should end before drastic remedies are applied, then—however great the industrial activity may be—the same fundamental defects will exist and with them the same possibilities of a recurrence of the depression.

The trouble is that the promised return of prosperity to the United States may seriously imperil the World Economic Conference. The depth and universality of the depression was sufficient to shake the public of the United States—or at least a significant section of that public out of its customary provincialism and complacency. The very persistence with which it has been dinned into them that the depression was due to world-wide causes (and thus incapable of solution by internal action), produced an interest in the World Conference which otherwise would have been lacking.

New, however, things are looking brighter; a different attitude is abroad. The interest in international affairs is waning; that in local affairs waxing. The people are swinging back to normal. The United States delegation set off for London with the firm intention of stabilizing the relation of the dollar to the pound. The British wanted to stabilize the pound around \$3.50; the Americans around \$4.75. A tentative compromise of \$4.00 was reached. In the meantime, however, the United States dollar started to slide downwards; things began to hum and prices to rise. And suddenly it became evident that a great deal of latent temporary advantage might be gained by letting the dollar move at will, finding its own level and stimulating American business. This has caused a natural slackening of interest in any effort to stabilize the dollar in relation to the pound. Quite plainly it has now become apparent that there may be more immediate advantage to be gained from not stabilizing than previously was thought to be the probable result of stabilizing.

If the inflationary attempts of President Roosevelt, and other radical policies of his administration, do nullify the World Conference, will it be an advantageous thing or not? There are two schools of thought concerning this—one school which believes world action is necessary; for effective remedies to be applied; the other school which believes that only when nations take action internally ignoring world conditions, will any effective remedies appear.

CLIVE SPORTS DAY

The Annual Carnival under the auspices of the Women's Assn. of Clive United Church will be held on July 5th. There will be ball games, races, tago-war, wools show, and other attractions. A play will be put on in the evening entitled "Is Marriage a Failure." Come to Clive on the 5th and have a real time.

ST. ANDREW'S CHURCH

Pastor: Rev. R. B. Layton
Musical Director: Mr. L. D. Wright, G.U.E.C.C.
Sunday, July 2nd
11:30 a.m. Morning Service and Sunday School
7:30 p.m. Evening Service
Congregational picnic will be held on July 1st, at the United Camp, Meridian Beach. Cars will leave the church at 10:00 o'clock a.m.
The Camp begins July 3rd, and Girl's Camp on July 12. Cost to each camper is \$4.50.

There was a large number of friends at the Depot on Saturday morning to wish bon voyage to Mr. and Mrs. William Ritten, and Mr. and Mrs. the Misses Berry, who are taking a holiday trip to their homes in the Old Country. They expected to be away two or three months.

The Threat of Prosperity

The People Must Pay.

Few, if any, subjects are engaging the attention of people in Canada, as in most countries, as closely as the subject of taxation. The rising burden of taxes is a matter of deep concern to all. Fortunately, it is receiving serious consideration, not only by those responsible for the administration of public affairs, but by individual citizens.

Taxation in our modern democracies is by no means a simple problem; it is cumulative in effect, and its control is extremely difficult. Every governing and administrative body set up imposes a measure of taxation upon all of us, and, in addition, there are many calls made upon people which, while voluntary in one sense, constitute, in the final analysis, a form of taxation.

First, we have Federal taxation, direct and indirect, levied in a great variety of ways through such agencies as the tariff, excise duties and taxes, sales taxes, income taxes, stamp taxes of various kinds, license fees. Provincial Legislatures follow with a second income tax, land taxes, amusement taxes, license fees to be paid for this, that and the other almost without number. Then the municipalities place another tax on lands, on improvements thereon, some levy a third income tax, some an additional amusement tax, all of them have more license fees to charge. The school boards impose further tax to meet the costs of education.

Hospitals have to be provided for, to some extent this is done through taxation, Provincial and municipal, but often this form of taxation has to be supplemented by voluntary contributions, but which, in reality, are a tax on business and income. Churches have to be maintained, even though the law may not compel us to do so, and thus people are in effect again taxed if they are willing to be, and most of them are. Philanthropic and charitable organizations and services of all kinds are maintained in the same way.

The cumulative effect is to produce an almost impossible burden, until now we find articles appearing in magazines, financial journals, the daily and weekly newspapers recording the hundreds of millions of debt that have been created, and the scores of millions that must be annually raised in taxation, while organizations of all kinds are conducting investigations and studies with a view to arriving at some means whereby the burden can be lessened, and any further increase of it prevented.

Prevention of any further increase is an easy matter if the people, who are the sufferers, determine there shall be no further increase. Individuals know they must keep within their incomes, or they are headed for trouble and disaster. Private business knows it must accommodate itself to its income, or it will end in bankruptcy. What individuals and business must realize is that what is true in their respective cases is likewise true in public business.

Many people, possibly a majority of them, who are fully aware that they must live within their incomes, have nevertheless acted in the belief that it was not necessary for the governing bodies to be frugal and supported by them, to follow the same course. Rather, people have insisted that their governments, Federal, Provincial, Municipal, should provide this and that service, and as the people make and un-make governments, the latter have naturally done what their creators demanded they should do. But these same governments have no income except the power to tax people, and this they have proceeded to do.

What people must realize is that if they demand of their governments certain services they must be prepared to pay for those services. They cannot have them otherwise. And if they cannot afford to pay for them, then there is only one thing they can do, and must be prepared to do, and that is go without them. That is, in their collective capacity they must govern themselves by exactly the same rules as they are forced to recognize and obey as individuals—if they cannot pay they must be prepared to do without what they would like to have and would have if they could afford it.

It is being predicted that the worst of the depression of the last three or four years is over; that things are once again on the up-grade; that better times are slowly but surely developing; that, in a word, the world is beginning to turn that corner around which it has been said prosperity is lurking. Let us all hope so. But when we have reached and turned that corner, and we are once again tempted to demand something of our governments we would like to have, and think they ought to supply, it will be the part of wisdom to pause and consider whether, after all, we can afford to have it, because, no matter what it may be, it will have to be paid for, and paid for by us—the people—and paid through the medium of taxes in one form or another.

Many glorious promises are frequently made, and are still being made notwithstanding the bitter experience of the past few years, of what the State can, and ought, and will do for all the people if certain principles in administration are adopted. But if these wonderful things are done, the people will pay for them in taxes. And every dollar that people have to pay in taxes is just a dollar less left in their own pockets to spend in meeting their individual tastes and desires and needs. Either they are going to do certain things for themselves as they desire to do them, and pay for them themselves, or they are going to let the State do it for them, and then the State may determine they should be done, and then pay the State in taxes for the services so rendered.

In any event, and under all circumstances, the people will do the paying. They, too, can do the ordering. They can order beyond their means, and get into trouble. They can order for themselves, according to their own needs and desires, and pay for what they order. Or they can order the State to do the ordering as the State may see fit to do, and then pay the bills incurred by the State. And the decision, whatever it may be, will be the decision of each and every man acting in his or her capacity as an individual free citizen.

The main point to remember is that there is, notwithstanding the mistaken use of the word, nothing free in this world. Everything has to be paid for, and it is the people who have to foot the bills. Therefore, the day and the manner of settlement should always be kept in mind before the liability, whatever it may be, is incurred.

British Built Aircraft

Have Been Granted An Official Distinguishing Mark

British-built aircraft have been granted an official distinguishing mark—a lion rampant in gold within three rings of red, white and blue. Within the white ring are inscribed the words, "British Certificate of Airworthiness." The mark has been registered under the Trade Marks Act. The air ministry announced that of the new mark, which will at once distinguish British-built flying machines, no matter what nation's registration markings they bear, states that the mark is authorized to apply to any aircraft, whether lighter or heavier than air. No fee is required for the authorization.

The first aircraft mark authorized was affixed at the London air station, Croydon, to "Astraea," one of the Imperial Airways fleet.

Sixty per cent. of the public school buildings now used in the United States are one-room structures. The new coal mine in South Wales is expected to produce 2,000 tons a day. Greece expects larger cereal crops this year than in 1932.

MILBURN'S HEART AND NERVE PILLS

Her Heart Was Weak Nerves Shaky, Nights Restless

Mrs. A. Black, Wallaceburg, Ont., writes:—"I suffered from heart weakness, shaky nerves, and restless nights. I saw your advertisement for Milburn's Heart and Nerve Pills and decided to try them although I did not have much faith, but now I am very thankful I did as they have proved of wonderful help to me. I am now strong and well again, but am never without a box in the house."

For sale at all drug and general stores; put up only by The T. Milburn Co., Ltd., (Toronto).

Scientific World Is Reserving Judgment

As To Whether Living Bacteria Is Found In Meteorites

No successful refutation has yet been put forward of the claim of Professor Charles E. Lipman of the University of California that he has found living bacteria in meteorites, according to Professor F. E. Lloyd, of McGill University, president of the Royal Society of Canada.

While making it clear that he was not committing himself to support of Professor Lipman's theory, Professor Lloyd, who has been in communication with the California scientist, declares that all who know Professor Lipman recognize in him a careful and exact observer who is not given to rushing into half-baked theories. Professor Lloyd declared that Lipman's account seems to indicate that he had taken every precaution he could think of to guard against the accidental transplanting of bacteria into his samples.

The McGill professor also informed The Toronto Star Weekly that an earlier theory of Professor Lipman announcing discovery of live bacteria in coal seams is supported by a German scientist, who, working independently, came to the same conclusions as Professor Lipman.

Like Professor Lloyd the scientific world is still withholding judgment on both cases, although Professor Lipman's announcement as to meteorites is criticized by some who assert that the bacteria must have got into the meteorite after they had reached the earth.

A Long Session

Last Session Of Parliament Extended Over 232 Days

The session of Parliament just closed lasted for 232 days, including the adjournment from November 25, 1932, to January 30, 1933. Only two sessions since Confederation in 1867 have been longer: the longest being the third session of the 11th Parliament which ran from November 17, 1910, to July 29, 1911, or 255 days. The next longest was the seventh session of the 12th Parliament, which sat from January 18, to September 20, 1917, or 246 days. The third session of the fifth Parliament sat from January 29 to July 20, 1850, or 183 days. The shortest session was the fourth of the 12th Parliament which met on August 18, 1914, and prorogued on the 22nd of the same month. Those five days, however, were among the most momentous in Canada's history for in that brief time the Dominion decided on the policy to be adopted in connection with the Great War.

Born In Fort Churchill

Late A. W. Griffin was Factor Of Hudson Bay Post At Wabigoon, Began In Fort Churchill 73 years ago, where his father the late Charles G. Griffin, was chief factor for the Hudson Bay Company, Arthur Henry Griffin died in Edmonton, where he had made his home for 15 years. He joined the North West Mounted Police as a young man and after seeing service in the old force, went to Alaska. In the early years of the century he entered the service of the Hudson's Bay Company, and, like his father, became factor of a company post, living at Wabigoon for 12 years.—Lethbridge Herald.

Largest Weighing Scales

Montreal will have the largest weighing scales in the world when installation of the new Avery grain scales is completed at the marine tower jetty of No. 1 harbor commissioners' elevator. The new machine was built in England and will be able to weigh 240,000 bushels of grain an hour, or 200 bushels a minute.

Replanting Trees

Lumbermen of Northern California have replanted 25,000 acres of cut-over land with 6,365,000 young redwood trees. The trees being replaced had taken from 1,000 to 3,000 years to reach their fine maturity, indicating how clearly California realizes that it is a young State with a big future.

At the present rate of ice recession, the glaciers of Mount Rainier National Park probably will disappear in a few thousand years.

"In these bad times you can still travel first-class?" "I have to. I meet my creditors in the third class."

Theory Before Practice

Advances In Agriculture Due To "White Collar" Farmers

There was considerable food for thought in a statement made at the luncheon at the O.A.C. by Major Robert Weir, Federal Minister of Agriculture. Major Weir was answering criticisms of what were frequently referred to, slightly, as "white collar farmers."

The inference, of course, is plain. The "white collar farmer" is the theoretician; the man does not take off his coat and work in the fields. But, after all, there is no broader work than that of the theorist. Men who have made the greatest advances in the science of agriculture have been "white collar farmers." Tremendous advances in wheat crops alone have increased the wealth of this country by millions of dollars.

A knowledge of controlled experimentation was necessary to make the great discoveries which have literally revolutionized wheat growing. A practical farmer, no matter how great his knowledge, could not have the necessary scientific information to enable him to carry out such a series of experiments.

This is only on instance where hundreds might be quoted. After all, theory must come before practice. Nothing of value can be done unless it is carefully thought out beforehand.

In livestock, in crop rotation, in poultry raising, in every individual branch of farming the "white collar" farmer has done more than his share in the advancement of what is without doubt, Canada's basic industry.—Guelph Mercury.

Trying Out Home Product

Eastern Candy Manufacturers Buying Cherries From Okanagan Growers

Between 6,000 and 8,000 barrels of cherries are imported by Canadian candy manufacturers each year. These are preserved in weak sulphuric acid and come mostly from Italy.

British Columbia cherry growers are giving some attention to this outlet for their crop and through F. E. Atkinson, of the Summerland Experimental Station, have made inquiries in Eastern Canada. The Royal Anne variety of the Okanagan Valley, is thought to be suitable for this processing. Eastern manufacturers will take several carloads this year as a first attempt in the use of Canadian cherries. Freight rates, it appears, are lower from Italy to Montreal than from Okanagan points, which may be an obstacle to trade.

It may be possible to finish the cherries in the Okanagan and compete directly with the eastern manufacturer on his own market. In the case of the finished or glazed cherry, freight would only be paid on the actual fruit plus sugar and carton or pack. There is another advantage in the fact that the barrels would remain in the West. If shipped East and not returned, the loss of barrels would approximate over a cent a pound on the contents.

Origin Of The Eskimo

Scientists Discuss Connection Between Eskimos and Siberians

Aborigines. Origin of the Eskimo is a problem with which scientists are still battling and regarding which many theories, each possessing substantial merit, have been expressed. To the Gadenmud Hall, of the University of Copenhagen, presented a thoughtful paper in which he analyzed and discussed the connections between the culture of the North American Eskimos and that of the Siberian and Northern European aborigines.

Sounds Sensible

Never make a threat tell the truth, always and place all your cards on the table is the doctrine Sir Eric Drummond of Great Britain, has learned from 13 years as head of the League of Nations. "This," Sir Eric added, "applies to individuals as well as to nations."

AFTER WINNING THE AUTO CLASSIC

Louis Meyer (right) winner of the 500 mile Memorial Day classic at the Indianapolis Speedway, pictured with his mechanic in their car just after the finish of the grueling race. Meyer, whose victory marks his second triumph in the big event, set a new record for the contest.

CAPTURED BANDIT

Sought for years as the last of the powerful Corsican bandit chiefs, Andre Spada (above) recently surrendered to the authorities at Ajaccio, Corsica, where he appeared in rags with a crown upon his head. Authorities believe the bandit leader's mind is deranged.

Establishing a Pedigree

Cost Fairly Expensive To Obtain Coat-Of-Arms

Half-way down the busy length of Queen Victoria St., London, England, stands the College of Arms. It is, appropriately enough, a mellow brick building in the Tudor style, and it houses the imposing hierarchy of the Herald's College.

Nowadays the principal duties of the heralds and their assistants are the granting of coats-of-arms and the tracing of pedigrees. Mention of a herald doubtless brings to the minds of most the picture of a gorgeously caparisoned figure, sounding a fanfare on a trumpet from which hangs a banner.

If you were to call at the herald's office in Queen Victoria St., however, to interview Bluenante or Portcullis, or even the most august Clarenceux or Norry, you would almost certainly discover a gentleman in civilian dress, wearing a black coat and striped trousers, sitting in an office and looking very much like a barrister waiting for a brief. Interviews with heralds, indeed, are rather likely to prove expensive, for it costs about £75 if one of these august officials puts you in the way of securing a coat-of-arms. It costs some thing, too, to establish a pedigree, but when once the Herald's College has granted a pedigree the latter becomes a legal document.

Assumes People Are Interested

Alberta Parliament Issues Pamphlet Giving Summary Of Legislation Passed

In Alberta as soon as the Legislature rises, the King's printer puts out a neat pamphlet—there are sixty pages in this year's issue—giving a summary of the legislation passed. The pamphlet is compiled by J. D. Hunt, clerk of the executive council, and is in language which everyone can understand. The pamphlet is cheap enough to be put into the hands of everyone who is interested and conveys all the information the average man or woman requires. The Alberta Legislature, by whose order the pamphlet is issued, pays the people of Alberta the compliment of assuming that they are interested in the business and laws of their province.—Vancouver Province.

Wicked Nevertheless

An elderly churchman after voting year after year against the Union of the Kirk, suddenly went over into the Union camp. He was twitted with inconsistency. "No," he said, "I'm no inconsistent, I still believe Union is wrong. I believe it's wicked. But it's the Lord's will."

All the gold mined in the world since Columbus discovered America, would amount to about \$22,413,000.

Chinese in other parts of the world are estimated to have sent \$67,500,000 to China last year.

Daring Burglar Still Is Puzzling Detectives

"Gimlet" Jimmy Reported To Have Made \$100,000 In Cleverness

Robberies. "Gimlet" Jimmy, the most daring—and elusive—burglar in England, whom detectives have been trying to capture for 11 years, carried out two robberies involving £1,300 in cash, early on a recent morning with lightning swiftness.

The problem facing the police in their hunt for Jimmy is that they have no notion of his appearance. Nor has he ever left behind him a single clue which, in the event of his capture, would definitely establish his identity with his previous crimes.

Only once has a glimpse been caught of him. That was seven years ago when, in carrying out the greatest coup of his career—the raiding of a Deangate, Manchester, bank—the night watchman saw Jimmy pay for a fleeting instant as he ran past the man in making his escape. But Jimmy, who nearly always confines his activities to the north of England, has one invariable method of approach.

For weeks he watches and learns the habits of his intended victim, usually a wealthy shopkeeper.

Then, one night when Jimmy begins work.

First a visit to his victim's house for the keys of the shop and any valuables in the home safe.

Afterwards, armed with the keys, there is the raid on the shop.

On the latest occasion, Jimmy entered the home of W. Smith, of Ashton-on-Mersey, and, without waking the owner, took a bunch of keys from the bedside and opened a safe in the house, from which he took £300.

Half an hour later Jimmy had taken as much as £1,000 from the safe of Mr. Smith's shop in Gorton.

Jimmy, whose name of "Gimlet" comes from his peculiar method of entering a house through a window, is estimated to have secured more than £100,000 by his burglaries.

Sailing Vessels

Most Common Signs Of Sailing Ships In Use Today

Writing in "The Twentieth Century," on "Ships and Things," Mr. Ted Ridge gives a brief description of the most common signs of sailing vessels that are in use today. The landlubber, ignorant of these matters, will find the list very informing. This is it:

A Ship (three or four)—is a vessel with three or four masts, square-rigged on both with triangular sails between the masts and ahead of the foremast.

A Barque is a vessel with three or more masts, square-rigged on all except the aftermost mast, which is fore-and-aft rigged.

A Brig is a craft with two masts, square-rigged on both with staysails between the masts.

A Brigantine has two masts, is square-rigged on the foremast, and fore-and-aft rigged on the main or aftermost mast.

A Schooner has two or more masts and is fore-and-aft rigged on all.

A Topsail Schooner is one having two or more masts, fore-and-aft rigged on all, but having two square topsails on the foremast.

A Ketch has two masts, both fore-and-aft rigged, but the mizzen or after-mast is smaller than the main-mast and is stepped forward of the rudder.

A Yawl has two masts and is similar to a Ketch, but carrying the mizzen mast stepped well aft.

A Cutter is a vessel with one mast, fore-and-aft rigged.

A Sloop is similar to a Cutter, but carries only one headsail.

Protective Program

French Government Bill To Control Production

Comprehensive control of wheat growing and selling under the direction of the rudder has been proposed in a government bill introduced in the French parliament.

Growers would be obliged to declare the acreage sown and the amount of their wheat stocks. The committee would be empowered to control production of spring wheat and to utilize many present laws to regulate sales, finance storage and guarantee prices.

Drastic measures have been taken by the government to keep out all importations of grain in an effort to protect the farmer. Higher tariffs, licenses, stocking, encouragement of the use of wheat for other than food purposes, and arrangements with North African exporters, constitute the protection programme.

The parrots, tortoises, reptiles and birds of prey are found to be the longest lived inmates of the London zoo.

Oil production in Prussia now averages about 125,000 barrels a month.

Any fool can talk, but only wise men know how to think.

Put Ogden's Cut Plug in your pipe and join the parade!

Step along with those who've discovered the pleasure that only Ogden's Cut Plug can give to a pipe smoker.

There's only one way to prove that Ogden's Cut Plug is the kind of tobacco you're looking for—put it in your pipe and smoke it!

OGDEN'S CUT PLUG

If you "roll your own," use Ogden's fine cut cigarette tobacco and Chanticleer cigarette papers

Not Affected By Depression

New Zealand Has Steadily Increased Volume Of Exports

The effects of the depression upon New Zealand have been to some extent modified by the success of efforts to counter-balance falling prices by increasing production. While other countries have been afflicted by rapid contraction of their export trade, in volume as well as in value, New Zealand has steadily increased the volume of her exports. In 1928 exports were 12 per cent. greater than in 1926; the official estimates for 1931 show an increase of 20 per cent. in five years, and the volume must have been again substantially greater in 1932, for, in spite of a much lower range of prices, the total value was larger than in 1931.—Auckland News.

Colonization Plans

Calgary Families To Be Settled On Land In The North

Under a plan proposed by Calgary city council by Rev. O. P. Brown, president of the Land Association of Calgary, 30 families on unemployed relief in Calgary would be settled on the land at St. Paul de Meis, north of Edmonton.

The 30 families have made application for the transfer and efforts to bring them under the Dominion Government back-to-the-land scheme are being made, so the colonization scheme can go through.

"Jones Minor, your father 'pep'd you with this essay?'"

"Yes, sir."

"Did he write it all?'"

"No, sir. I helped him. I corrected his spelling mistakes."

The annual crop of icebergs from the Greenland glaciers is about 15,000.

A diamond, when chemically pure, is composed solely of the element carbon.

World Famous Scientists Throw Some Light On The Mystery Of The Gulf Stream

Ever since the Gulf Stream was discovered, it has been a source of speculation among oceanographers. Some of its mystery has been reached by the layman: Where does the stream start? Where does it end? What does it do? The recent report to port of "the Atlantis," the floating research laboratory of the Woods Hole Oceanographic Institution, after several months' cruise in tropical waters, solves much of the deep riddle of the Gulf Stream.

According to data collected by world-famous natural scientists from various institutions who made up the expedition's personnel, the stream is not, as is popularly supposed, a vast ocean current flowing from the Gulf of Mexico through the straits north past the coast of Florida out into the Atlantic, passing the British Isles and spending itself in far northern seas.

It is really a huge dynamic current, which, following the above route, sweeps to Spitzbergen and then circles back south via the North Sea and the British Channel to the east Atlantic until it strikes the west coast of Africa. At that point, the Trade Winds between Cape Verde and the Equator cause the stream to defect westward until it finally reaches the Caribbean Sea.

From there it moves to the Gulf of Mexico, and so completes a long dynamic circle. This current is in perpetual motion, varying very little according to the season of the year. Its age is unknown, for it cannot be calculated just when the temperature of the ocean dropped to the point where the stream began to flow. And its possible future is unpredictable, for no scientist has been able to estimate how cold the waters in its circuit must become before it will no longer be able to move.

As a matter of fact, there is some dispute as to whether the stream is caused by convection currents, or whether the diurnal turn of the earth on its axis plus its seasonal tilting is responsible for the mighty swirling of the waters of the North Atlantic and neighboring seas.

So, even if the voyage of "the Atlantis" has satisfactorily discovered that the Gulf Stream circulates the Atlantic, touches four continents and returns, there is much of the mystery yet unsolved.

Tahiti Telephone Girls Have Excellent Memory

Know Names, Addresses, and Movements of All Subscribers

"Hello, operator, let me have Bill Jones, please."

"He's not at home right now, but I can connect you with Jack Smith's house, where he has just gone."

That's the kind of Utopian telephone service there is today in Tahiti, out in the South Seas, where the operators know the names, movements, and addresses of all the telephone owners and speak three languages—English, French and Tahitian.

There is no directory, no numbers to bother with. You just call out and give her the name of the person you want to speak with and here you are. It is quite a feat of memory, however, for there are about 250 telephones on the island.

In the old days, only French and Tahitian were spoken, but since Tahiti has become a paradise for Americans, English can now be used. The salary paid the telephone girls is around thirty dollars a month. At present, there are two operators employed.

New Mail-Carrying Plane

High-Speed Machine Built For British Air Ministry

The newest high-speed mail-carrying aeroplane built for the air ministry by a London concern is an all metal biplane, with two Bristol "Pegasus" engines. It has a cruising speed of 172 m.p.h., with a top speed of nearly 200 m.p.h.

It will pick up and drop mails in flight. The picking-up gear, it is expected, will be similar to that used by the Royal Air Force—a dropped line with trailing hook.

Found Begging Profitable

Begging has proved a very profitable vocation for many villagers who have been travelling from their homes to Prague, Czechoslovakia, to solicit alms regularly. Among those caught in the police net recently was Elizabeth Czoka, aged 63, whose "earnings" averaged \$6,000 a year. David Jask, 73, collected about \$22.50 a day, but he "worked" only every other day. Young Ernest Janick's receipts averaged only \$7.50 a day.

Film Magnate (entering studio): "Who's that fellow over there?" Director: "Why, that's Napoleon." Magnate: "Why did you get such a little man to play such an important part?"—Pathfinder.

A combined telephone booth, mail box and stamp-vending machine is to be tried in Dunoon, Scotland.

W. N. U. 1998

Live Fowl Is Not Meat

Montreal Lawyer Proves His Point In Law Suit

Do live chickens constitute fresh meat? Such was the problem involving points of zoology which was left with Recorder G. H. Simple, of Montreal, for a decision when he took under deliberation the recorder's court a case in which a firm of wholesale dealers in live poultry and eggs were charged by the city with having unlawfully kept an unlicensed store of the "wholesale trade of fresh meat."

The charge was made under a bylaw which exacts a \$100 licence fee. But the attorney for the defence, delving into such learned works as the Oxford and Webster's dictionaries, and produced the definition of meat: the flesh of an animal, in contradistinction to fish and poultry. Fresh meat, he submitted, implied, then, the fresh flesh of animals, in contradistinction of fish and poultry. He also submitted—and produced lexical evidence to prove it—that an animal, when alive, did not constitute meat; it was only when it was dead that it could be termed meat.

"The flesh of poultry," contended counsel, "does not constitute meat; if we deem it to be meat, then when the chicken is alive, it is not yet meat."

Protected By Treaty

Denver Police Cannot Kill Woodpeckers No Matter How Annoying

The Denver Police department's "woodpecker squad" has been treading on the tender toes of international law, government local attorneys recently pointed out.

Patrolmen A. E. McCasland and L. C. Sawyer, who make up the "squad" were ordered to eliminate the annoying, noisy creatures, but they have been disturbing the slumbers of Denver citizens.

On one morning the "Woodpecker squad" bagged three redheads in one tree.

Then someone pointed out to Manager of Safety Carl S. Milliken that the federal migratory bird treaty act entered into between the United States and Canada protected woodpeckers. Milliken promised federal officials that the woodpecker killing would be stopped.

"B-r-r-r-r-r-r-r-r-r!" the woodpecker's noisy tattoo was again heard throughout the city. Sleepy citizens muttered, and cursed, but policemen's pistols remained in their holsters.

Many Herds On Test

April Summary Of Saskatchewan Dairy Branch Office Is Gratifying

The monthly summary for April of the Saskatchewan Dairy Branch office shows that there are 346 herds, comprising 3,330 cows, on test. The average production of these cows for the month was 783.2 pounds of milk and 28.4 pounds of butter fat. At no time during recent years has the production of butter fat per cow been below 25 pounds of butter fat per month. In most cases it has been nearer the 30 pound mark, which goes to show that cows on test are producing one pound of fat a day, which is considerably more than was being produced a few years ago.

Warman Association lead all other associations in the province with an average production of 890 pounds of milk and 32.1 pounds of fat.

Indians Are Learning

Held Out For Better Deal On Lease Of Lake

After some years of negotiation on the Carleton place the Indians finally have made their peace with the white man.

Today's Indians, better versed in business than their forebears, thought \$400 was too small a sum for surrender of a lake and the townsite of Carleton on a 90-year lease. Now the tribe has received a 25-year lease and \$800 a year for the first 25 years and an additional 10 per cent on all rentals after the first five years.

Ten-Thousand Mile Spin

An Englishman named Nicholas Bonnin has just set out on a remarkable journey in a two-seater motor car. He is driving 10,000 miles from Calcutta to London by way of Egypt, the north coast of Africa, and Spain. The car is fitted with an auxiliary petrol tank holding twenty-two gallons.

Eighty-eight elements are now generally recognized by chemists. Claims have been made for the discovery of four more.

Left-handed fountain pens are actually manufactured for the use of left-handed writers. The pen's point is cut obliquely.

Canadian Coal For Coke

Research Work Shows Suitability Of Canadian Coal For Producing Coke

Until recently the coke produced in Canada was made exclusively from imported bituminous coals. This caused Canadian bituminous coal operators no little concern, and as an outcome the Department of Mines undertook to carry out extensive tests, in its Fuel Research laboratories, on coals from both eastern and western Canada. A single unit of a commercial size, horizontal coke oven was erected for the purpose, and the coals were coked alone, and blended both with Canadian and with foreign coals. Efforts were then made to interest operators of coke plants in proximity to suitable bituminous coal supplies in a greater utilization of these commercial plants, which proved beyond doubt the suitability of Canadian coal for the production of a satisfactory coke. At present a number of plants are using Canadian coal exclusively, for the production of gas and coke, while others, operating under more difficult conditions, are using proportions varying from 35 to 50 per cent. It is likely that these proportions will be increased eventually.

Study Rural Life

Manitobans Go To Europe To Engage In Investigation Work

John Everett Robbins, M.A., of University of Manitoba, has been a member of the staff of the Dominion Bureau of Statistics for the past three years, has left for Europe to study rural life in the Scandinavian countries of Denmark, Norway, Sweden and Finland. He goes under the terms of a scholarship awarded by the Carnegie Corporation of New York and will engage in that special work for three months.

By "rural life" is meant anything that is characteristic of farm life, such as the rural educational system, cooperative farmers' organizations, systems of marketing products and farm credits in these four countries. Mr. Robbins is a son of Mrs. W. C. White, of Darlingford, Man.

A Royal Mascot

Goats Given To Welsh Regiments From King's Horse At Windsor

New goat mascot has been given by the King to the 1st Battalion, Welsh Regiment, to replace Taffy V., who died recently from pneumonia. Taffy V. won considerable notoriety a few months ago when he was on strike at the beginning of church service, owing to the absence of his goat major. His successor, Taffy VI, will soon march at the head of the battalion and will take an active part in all ceremonial parades. Taffy V. was also a gift from the King, and the goat mascots of the Welsh Fusiliers are from the royal herd at Windsor.

Unusual Building Feat

Offices Erected Without Disturbing Occupants On Same Site

A building feat was successfully accomplished at Prague, Czechoslovakia, when an eleven-story building housing a hotel, offices and shops, was put up without disturbing the occupants of the building formerly on the same site. Never were the occupants of more than one room at a time affected by the building operations. Walls were taken down in sections and new pieces put in.

The Wise Oriental

China Preparing To Levy Fines For Over-Eating

Fines for over-eating are to be levied in China. Government regulations posted in Nanking provide that no more birthday parties shall be given for persons under sixty years of age, the price for meals of Chinese food is restricted to an "economical sum," and no one must pay more than fifteen cents per plate for foreign food; banquets must not last more than two hours.

Photograph Is Popular

Russia Enlarging Factory To Produce Three Million Records Annually

Enormous popularity for the photograph, which in this country has been largely displaced by the radio, is evident in Russia. A record factory at Aprelevka, now already the largest in the Soviet Union, is being further enlarged to make an annual production of 3,000,000 disks. It turned out only a little more than 1,000,000 last year.

London's Latest Craze

Tiny models of aeroplanes constitute the latest craze in London, England

Although only a few inches long they are exactly to scale, and all well-known types are represented. To lead realism, model hangars, control towers and club buildings are also to be had, to say nothing of many diminutive accessories.

Steam From Volcanoes Runs Factories and Trolley-Cars in Italy

After a long decline, Germany's chemical industry is improving.

Winnipeg Newspaper Union

By Ruth Rogers

A NECKLINE THAT DOES THINGS

It's young and smart. You can tie it in a bow or wear it in a sporty scarf effect. Yellow crinkly crepe silk made this cunning blouse.

Wear it for spring with a grey suit or for summer with a white wicker skirt. A printed crepe silk is smart in poppy red and white combination.

Style No. 704 is designed for sizes 14, 16, 18, 20 years, 36, 38 and 40 inches bust.

Size 16 requires 1 1/2 yards of 36-inch material. Price of pattern 20 cents in stamps or coin (coin is preferred). Wrap coin carefully.

An Old Indian Custom

Little Houses Built Over Graves In British Columbia

Under the towering peaks of "Falling Rocks" mountain range, near Hazelton, B.C., of native graveyard is a blend of paganism and the new faith. Though many of the Indians have been Christianized, complete infidelity houses have been built over many of the graves. Clothes and belongings of the departed are placed inside.

In one skirts, shoes, corsets and mirror, brush and comb are hung on the walls. In another an enlarged portrait stands against a trunk filled with garments and toilet articles. Over chiefs graves stone poems symbolic of their clan are carved. Food is placed in the houses all most daily. It is invariably carried away by wild animals, such as squirrels and rabbits, but the Indians claim the spirits get the food through the wild life.

Usually Flatten Out

At the age of six a Chicago girl is said to be an accomplished toe and tap dancer, a pianist with a fondness for the classics, a composer and translator of music, a singer from memory of over 30 songs, an impersonator and able to read and write.

In spite of all of which, she is very apt to prove a failure at school and to end her days, as many another infant prodigy has done, in virtual obscurity.

It is now possible to manufacture

artificial suede leather for shoes or handbags from cotton by a new abrasive process.

CHARMING BLONDE CAPTIVATES MOVIE FANS

Margaret Grahame is voted by England's filming enthusiasts as the most beautiful screen blonde in British movies. The above picture was taken during her latest picture "Yes, Mr. Brown."

Have Observed Peace Pact

Scandinavian and Baltic Countries Good Neighbors For Over Century

For more than a century peace has reigned in the Scandinavian and Baltic countries. No war has ruffled the neighborhood of these nations for almost 125 years.

Sweden, Norway, Denmark and, further south, Holland, practiced the spirit of the Briand-Kellogg anti-war pact for more than a century before that document came into existence, a political writer on the daily Morgenthau reminds his readers. There is no counterpart to this phenomenon in the rest of Europe, he says.

Finland, Estonia and Latvia, all more recently constituted, are animated by the same spirit of peace, he adds, and can be added to the peace group. There have existed the writer recalls, serious disagreements during this long period that elsewhere almost certainly would have led to armed conflict, and in the old times the Northern countries fought between themselves often and bitterly.

They have now kept an unbroken peace, he says, thanks to the fact that they have ripened enough to realize the curse and the debasement of war, and the value of neighborly peace and the feeling of brotherhood.

Two facts he regards as especially interesting are that this north-western peace atmosphere of Europe has not arisen from written treaties but from an attitude of mind and that it has shown a tendency to stop the spread of European thunderstorms to the north-west and will most likely continue to do so.

Cutting Iron With Water

Machine Determines Wear On Aeroplane Propellers Or Turbine Blades

There is an old proverb which says "constant dripping wears away stone"; today it is easily demonstrated that a jet of water can make the hardest metal wear as soft as cheese. It is used in a machine prepared to determine the wear on aeroplane propellers cutting through a foggy morning, or the blades of a steam turbine revolving in ocean water. It is a sure test of the right kind of metal for the purpose.

Two plugs of metal, one of 20,000 revolutions a second, equal to 13 1/2 miles a minute. With each revolution the plugs meet and pass through jets of water little thicker than the lead in a pencil. The amazing result is that plugs of stainless iron or nickel steel wear halfway through in two or three minutes. Stellite and iron nitride, which is almost diamond hard, hold out for only fifteen or twenty minutes each.

Clash With Students

Sophomore Nonsense Gets On Nerves Of New York Residents

Some of the taxpayers and others equally unfortunate have decided that the sophomoric nonsense of the colleges of the city of New York. Weary with the parading and ranting of the young men, the common "people" of the neighborhood let go with some nice ripe tomatoes. Such resistance on the part of taxpayers was a shock to the budding intelligentsia. The students dispersed in disorder.

Just to show the world it cannot fool with college students and get away with it, the "left wingers" have called a general strike. This, they felt, ought to put the faculty and the public in their proper place.

Besides, when on strike, a student cannot be expected to study.

Now is the time to say farewell to depression with a lot of good buys.

Occasionally one meets a man whose mind is so weak it can't even wander.

Eighteen National Parks In Canada, The Three Largest Being In Alberta And Saskatchewan

Land Utilization

Much Land Occupied By Settlers Only Fit For Grazing Purposes

Five points for consideration in a plan for land utilization in the western United States was presented to the Fifth Pacific Science Congress in a paper by Clifford B. Zierer, of the University of California.

About 180,000,000 acres of unreserved public domain were available to settlers under the homestead laws. Mr. Zierer said. Most of this land was now subjected to unrestricted grazing and was badly in need of protection.

Much of the land settled in recent decades and practically all of that still subject to homesteading is useful only for extensive grazing.

New irrigation projects should be established, Mr. Zierer held, until existing ones were fully occupied. Much of the marginal dry land might best be abandoned so long as the general over-production of agricultural products continued.

Large tracts of suitable land should be devoted permanently to timber production. Another paper read today, Prof. M. Y. Williams, of the University of British Columbia, held distribution of fossil and living land life around the Pacific Ocean indicated land connections once existed between Asia and North America.

Improvement Has Been Steady

Upward Swing Of Price Of Farm Produce Looks Permanent

It is highly gratifying to note the advance made in market prices of farm produce, a trend which has been maintained since the beginning of the year. True, there are recessions and there are causes where there is little or no actual gain. Fortunately for Canadian farmers, the greatest improvement has been seen in grain and live stock which bulk largely in their sales.

A recent estimate made by the United States Department of Agriculture, indicates a gain of seven per cent during the 30 days ended May 15, the largest for any one month since April, 1919. Grain led the way with an advance of fifteen per cent. Most products were up eight points, poultry and eggs, six points, and dairy products four. Wool was outstanding with a jump of seventy-five per cent during the month. The improvement has been steady and affects most all farm products which indicates that the upward swing has all the elements of permanency.

System Is Centuries Old

Babylon Had Debt-Adjustment Act To Help Farmers

Governments wrestling with debt-adjustment acts to relieve the farmer and others of debt payments during these days of depression are doing nothing new but using a lot of unnecessary words in their resolutions, amendments and preambles.

"Centuries ago they had debt-adjustment acts and moratoriums and they were worked tersely and to the point. Ernest Wilson, Edmonton lawyer, has produced "Paragraph 48. Code of Hammurabi." It was found inscribed on clay tablets by archaeologists in the ruins of Babylon. It follows:

"If a man has incurred debt, and a storm has flooded his field and carried away the crop, or the corn has not grown because of drought, in that year he shall not pay his creditor. Further, he shall post-date his bond and shall not pay interest for that year." The wise and humane Hammurabi was the sixth king of the first dynasty of Babylon. He reigned around 2250 B.C.

Taste Of Mucilage

Suggestion Made That Flavored Stamps Should Be Used For Benefit Of Stamp Users

In future mucilage on stamps may be flavored to suit the tastes of those who like to lick them. If a suggestion made at the annual convention of the Ontario division of Canadian "Postmasters' Association, brings action from the department at Ottawa.

Delegates didn't like the taste of the mucilage being used at present and one suggested it be flavored with lemon to make it more palatable. "Get a mouthful," said President W. W. McGuire of Winton, "and it's terrible." Another delegate said strawberry would be nice on the red stamps, while the blue ones would carry the taste of the blueberry.

Population Should Grow

London's Cockney population should be many thousands more when the five re-cast bells of St. Marylebone (Bow Bells) Chappell, are restored. This is on the principle that all persons born within sound of Bow Bells are Cockneys, an expert having calculated the music of the famous bells will carry a considerable distance further than formerly.

All the national parks in Canada

A total of 618,215 persons visited the 18 national parks of Canada in the fiscal year 1931-32. These great reservations cover an aggregate area of 18,000 square miles. Each has its own attractive characteristics. There are three scenic and four animal parks in Alberta, four scenic parks in British Columbia, one scenic park in Manitoba and one in Saskatchewan, and one in New Brunswick, one recreation park in Ontario and two island parks in Quebec. The largest of the parks is Jasper, Alberta, which has an area of 4,200 square miles. It is described as an immense mountain wilderness, with numbers of undimmed peaks, glaciers, lakes of wonderful coloring, hot springs, a big game sanctuary and one of the finest golf courses in North America. More than 11,000 persons visited Jasper Park last year. Banff, the next largest park, has an area of 2,585 square miles. It is situated on the eastern slope of the Rocky Mountains. This mountain playground, in which the incomparably beautiful Lake Louise is located, offers as recreations, ice climbing, riding, swimming, golf, tennis, in the summer and a variety of sports in the winter months. It is the most popular of all the national parks in Canada. Last year 183,946 persons visited this park. Prince Albert Park in Central Saskatchewan is the third largest park with an area of 1,860 square miles. It is situated in a forest country and has many lakes and streams in which there are excellent fishing, and has ideal camping grounds for motorists.

All the national parks in Canada are easily accessible by motor car, and within the borders of the parks are 567 miles of motor roads, 2,514 miles of trails and 1,066 miles of telephone lines. The smallest of Canada's national parks is at Point Pelee, a short distance from Windsor, Ontario, and Detroit, Michigan. This park, only 6.94 square miles in area, is at Canada's most southerly latitude. Near to Banff it attracts the largest number of visitors. Last year over 100,000 persons went there in 38,105 motor cars, over 80 per cent, being from the State of Michigan. This park constitutes one of the finest bird sanctuaries in Eastern Canada. It is one of the principal routes of migration for birds to and from their northern breeding areas and is one of the most attractive places in Eastern America.

All the national parks in Canada are open to visitors to whom every facility for enjoying the recreational advantages is offered.

Oldest Woman In World

Irishwoman 122 Has Excellent Memory and Likes To Talk

Mrs. Catherine Brickland, of Ballycomon, Ireland, was in a cheerful mood on her 122nd birthday. She is known as the world's oldest woman. She likes to talk, and her memory is excellent although her hearing is a little affected, and her eyesight impaired as a result of an accident some years ago.

After she had talked about things that happened in her girlhood, she was asked what she thought of Miss 1933 with her dance halls, amusements and dress. There was a long pause, then she said, "I suppose youth must have its fling."

Born in 1811 at Geshill, Mrs. Brickland has been a worker for over 112 years. When her husband died about 60 years ago she gave up domestic duties and became a herder on a farm near her home.

Mrs. Brickland is looked after by her daughter, Mrs. Feery, who is herself 68 years of age.

Mining Boom

Ghost Towns Of Western States Have Come To Life

Ghost towns of the old west—Tombstone, Virginia City, Leadville, Tonopah, Angel's Camp and many others which reddened and gilded American history a few pages back—may be clothed again in the flesh and blood of a mining revival if initial prices continue to advance.

Signs of resurrection appeared recently in an Associated Press survey of the mining areas of California, Washington, Nevada, Arizona, Utah and Idaho. In each state operations of established firms are stirring new life.

English Firm Gets Tender

The British firm of Messrs J. W. Gibson has been awarded by the Egyptian government the big contract of building the Gebel Awha dam, a few miles south of Khartoum. Their tender was for \$10,390,450. Four firms, all British, tendered for the contract. It is estimated that the building of this dam will increase Egypt's cultivable land by 300,000 acres, and will take four years.

One great mahogany tree from West Africa, a real giant, brought almost ten thousand dollars on the British market.

The Light-Running New John Deere Grain Binder

Judge Its Value by These Vital Things:

Lighter-Running—resulting from the use of eight sets of roller and ball bearings, self-aligning bearings, better lubrication and easiest possible handling of the grain.

Better Oiling Facilities. It is easy to get to every operating part with plenty of oil—thus reducing draft and wear. The parts hard to oil on other binders are easy to oil on the John Deere.

Variable-Capacity Elevators handle smallest to largest volume of grain in the easiest way without waste and without clogging. Simple in design.

Improved Guard and Sickle. Knife operates in neck of guards like a mower knife. Replaceable hardened steel wearing plates guide knife. Easy to repair.

Improved Reel—lifts and shifts unusually easy. Reel pipe turns on easy-running chilled bearings and is gear-controlled at both ends—real cannot sag or whip.

Easily-Operated Bundle Carrier. A boy can easily raise and lower it. Simple, great capacity, does not scatter bundles. Stays in proper adjustment. Automatically swings back if it hits an obstruction.

All-Steel, Quick-Turn Tongue Truck. Wheels hold to the ground and take side draft and neck weight from hofes. Keeps binder running straight. Flexible axle permits both wheels to conform to uneven ground. All-steel construction—lasts practically forever.

When you consider the importance of these advantages, and compare them point by point with other binders, you will realize that the John Deere is the binder you want.

Come in and see the John Deere.

THE CHURCH OF ENGLAND IN CANADA

Diocese of Calgary
St. Cyprian's Church, Lacombe
Rector: Rev. T. H. Chapman
Mrs. N. Glasgow & Miss A. Inskip
July 2, 3rd Sunday after Trinity
11:00 a.m. Morning Prayer.
7:30 p.m. Evening Prayer.
St. John's Church, Clive
3:00 p.m. Evening Prayer.
Diocesan Summer School. This is
the last reminder. Summer school
assembles Monday, July 3rd at St.
Paul's Indian School, Cardston, and
goes on throughout the week. Get a
Registration Form from the Rector at
once if you are going.

Spruceville

There will be a dance in Spruce-
ville hall on Friday, July 14th, good
music.

Mr. and Mrs. Burton and Mr. and
Mrs. Roy Burton left on Sunday for
a motor trip to Ontario.

Mrs. Proudfoot and Mrs. Adams
went to Millet last Thursday as dele-
gates to the U.F.A. convention held
there.

The regular evening meeting of the
U.F.A. and U.F.W.A. will be held
in the hall on Tuesday, July 4th.

Mrs. Barnes will give a paper on
Home Economics. The roll call to be
answered by a recipe for a suit-
able supper dish for the summer. Mrs.
Adams and Mrs. Proudfoot will also
give their report on the convention.

Mr. and Mrs. Legg and Mr. Ewing
of Pennock, were visitors with
Mr. and Mrs. O. S. Young and
Mrs. W. P. Young last week. Mrs.
Legg staying on for a week's visit.

Mr. and Mrs. C. C. Burton and
Mrs. Walker were in Edmonton for
two days last week.

Mr. Woods and Mrs. Summers of
Nevis, Alta., were at Boden's on
Saturday, purchasing three head of
Youngs Ayrshires from Mr. James
and D. A. Boden.

Lincoln

There was a big crowd at the dance
in the hall last Friday, and every-
body reports a good time.

The farmers are all looking hap-
pier now, after the good rain, we had.
Don't forget the ball game next
Sunday. Meadowbrook and Lincoln
are playing.

There will be a play and dance in
Lincoln hall on July 7th. The Mead-
brook orchestra is playing for the
dance, so the music is sure to be
good.

The Lincoln Annual Picnic is to be
held on July 21st at Wilson's Beach,
everybody come.

Mrs. Morrish has been spending a
few days with Mrs. F. Riley.
The Fairview Young People are
presenting their play "Mary Made
Some Marmalade," at the Lincoln
Hall, on July 7. This play has been
presented several places and has
been a great success. Don't miss it.

A dance will follow the play, music
by the Meadowlarks. Admission to
play: Adults 35c., Children 20c.
Dance 25c., supper free. Everybody
welcome.

Meadowbrook

Mrs. O. Sims spent the week end
with Mr. and Mrs. Suiter of Spring
Valley.

We are glad to hear our teacher
Mr. Howard Sharp will be with us
for another year.

Remember the Meadowbrook Lad-
ies Aid are holding their Annual
picnic on July 6th on the Church
Grounds. Sports and refreshments of
all kinds.

Remember, Church Services this
Sunday. Our new minister will be in
charge of the service.

We are sorry to lose Rev. Mr.
Wright who has been with us for
the last 3 years.

We are sorry to hear Mrs. Erskine
Taylor has been ill. We wish her a
speedy recovery.

Bentley Notes

U.F.A. RALLY AT BENTLEY
There will be a big U.F.A. rally
and Picnic at Bentley Community
Hall on Wednesday, July 12th. After
lunch Hon. Irene Parby, M.L.A.,
and Mr. Elmer Roper, of the Alberta
Labor Party, will give addresses. In
the evening there will be a program
of community singing and other
musical numbers, followed by an ad-
dress by Hon. J. E. Brownlee. Every-
body is invited to attend.

NO FAIR THIS YEAR

For the first time since the forma-
tion of the Lacombe Agricultural
Society, there will be no Fair this
year. Owing to conditions and the
fact that the government grant has
been withdrawn the directors cannot
see their way to finance this annual
event. Later on in the summer, how-
ever, it is proposed to put on a stan-
dard and other events.

WORLD HAPPENINGS
BRIEFLY TOLD

Two days were all that was necessary for the people of Ontario to absorb completely an issue of \$25,000,000 provincial bonds.

It is estimated Chinese lost 50,000 men and the Japanese 10,000 in the intermittent warfare in North China. Manchuria and Jehol during the past 20 months.

Single workless from Edmonton and Calgary have gone to British Columbia to construct airports under the unemployed relief scheme of the Dominion Government.

Since the beginning of the current crop year, August 1, 1932, Canada's exports of wheat are 57,000,000 bushels in excess of the figures for the corresponding period last year.

Immigration to Canada for the first four months of 1933 totalled 4,162, a decline of 28 per cent. from the same period a year ago, according to figures issued by the Department of Immigration, at Ottawa.

Lieut.-Col. P. R. Shields, Calgary, was elected vice-president for western Canada at the Canadian Army Service Corps annual meeting at Ottawa, Lieut.-Col. F. Hyndman, Vancouver, who chosen western representative on the review of officers.

Montreal celebrated the centenary of the foundation of the city council with the unveiling of a plaque to the memory of Jacques Viger, Montreal's first mayor, and a ceremonial meeting of the members of the city council.

The King has approved the appointment of Lord Brabourne, distinguished barrister, as governor of Bombay in succession to Sir Frederick Hugh Sykes whose term of office expires in December. Sir Frederick has occupied the post since 1928.

The Canadian butter trade has more to fear from over-production of butter for the Canadian market than it has from imports of butter from New Zealand. Hon. H. H. Stevens, Federal Minister of Trade and Commerce, told a delegation from the Canadian Dairy Co-operative Creamery Association.

Growing Forage Crops

Large Increase in Acreage Sown To Grasses in Prairie Provinces

Enormous increase in the acreage in the prairie provinces devoted to grass is noted by T. M. Stevenson, in charge of the national forage crop laboratory at Saskatoon. Two western seed houses have sold over a million pounds of grass seed this spring. A large part of the grass seed passes direct from the seed house to the farmer. Mr. Stevenson was not prepared to make an estimate of the comparative increase but some authorities considered that 100 per cent. would be a conservative estimate.

The total reduction in grain acreage by this change of the will to cases this year as in the majority of cases the grass is seeded with grain.

This will mean that the decrease in grain acreage next year may be greater than that during the current year. Mr. Stevenson anticipated a great increase in hay acreage next year.

The grass chiefly sown has been bromegrass evenly distributed over Saskatchewan except in the north and east where the creeping habit of this grass is feared. Sweet clover and alfalfa have shared in the large increase while western rye has barely held its own. There is yet too little created wheat grass to be of commercial importance.

Questioned regarding compulsory wheat acreage reduction, one university authority remarked that due to wet weather seeding delay and the movement to grass had this year caused a wheat reduction greater than farmers would have been required to accept under any compulsory plan.

Officials visiting districts where soil drifting was very severe last year report an excellent stand of wheat on land that many had thought would be ruined by denudation of the top soil.

Intentions Were Good

Jones was at a dinner party. He was shy and could never summon up courage to speak because of his inability to say anything neat. All the evening he had been trying to think of something nice to say to his hostess. At last he thought he saw his chance.

"What a small appetite you have, Mr. Jones," said his charming hostess with a smile.

"To sit next to you," he replied gallantly, "would cause any man to lose his appetite."

Horse Stealing Revived

Horse stealing is not a lost art, according to James Chartrand, who has requested authorities to trace twenty horses missing from his 4,000-acre ranch on the Saskatchewan-Utah States boundary. An intensive search of the huge range was made for 100 missing horses, but only 80 were found.

The doctors say that there are probably hundreds of kinds of colds. No wonder it is easy to catch one of them.

W. N. U. 1998

Keen Interest in Silver

Price Means Everything To British Columbia Mining Camps

Silver, subject of many conferences and plans for boosting its price, has taken by storm the mining camps of British Columbia. Silver is everything to the people in the northern districts and is the sole topic of their talks and thoughts.

Higher prices for the white metal would be the solution to all their problems. Just as the price of wheat is the main interest of farmers on the western prairies, so is the price of silver the hub around which these miners live their lives. They talk silver and dream silver.

Their hopes raised by the advocacy of bimetallics for its remuneration, they read every word on the subject of silver and listen eagerly to lectures and discussions. If the price would rise 10 cents, they say, a dozen mines would reopen; if silver should advance to 40 or 50 cents an ounce the country again would be a hive of industry.

Seeking Market in Canada

Bermuda Agriculturists Investigating Result Of Recent Vegetable Shipments

Inauguration of a regular service of vessels between Bermuda and Quebec city is fore-advanced by W. R. Evans, assistant director of agriculture in Bermuda, who came to study the results of a recent experiment in the shipment of potatoes and celery on the S.S. Chomedy from Bermuda to the food markets of the ancient capital.

The cargo of the Chomedy was the first consignment of Bermudian vegetable products ever unloaded at Quebec.

According to Mr. Evans, Bermuda's vegetable season dovetails that of Canada.

Close Mounted Police Posts

Reported That Three Posts In North To Be Abandoned

Three R.C.M.P. posts in the far north will be closed under an economy reorganization plan, according to Major-General J. H. MacBrien, commissioner of the force.

The posts to be closed are at Liard, Hay River, and Wrigley. It is planned to handle the Hay River post from Providence, while Simpson will provide patrols to the Liard district and Wrigley of the force.

General MacBrien plans to go to Edmonton in August for a trip of inspection as far north as Aklayik.

Winnipeg Newspaper Union

By Ruth Rogers

Many Nations in Arrears

Twenty-Six Own League Large Sum For Membership Fees

Individuals who find some difficulty in meeting their current obligations may like to know that twenty-six countries which are members of the League of Nations are in the same boat. These states—comprising almost half of the League membership—altogether owe the organization 23,613,539 gold francs, or \$5,062,783, a sum which would run the League for nine months according to its present reduced budget.

China owes the League in dues more than \$2,000,000. Peru has paid dues only one year since 1920. Bolivia and Honduras never have paid their full dues in any year. Fourteen of the debtors are Latin-American countries—in fact only Mexico and Venezuela in this group are clear of debt to the League. Among European countries Germany is the heaviest debtor and owes \$288,663, Australia, the only British country not fully paid, owes \$80,322 of her dues for last year only.

Members of the League are assessed on a basis of national budget comparisons, and a total of 1,013 units of payment are allocated among the fifty-seven members. The British Empire is a very heavy contributor, the United Kingdom alone paying 100 units. France and Germany stand in second place with 70 units each. Canada, India, South Africa, Australia, New Zealand and the Irish Free State together have 152 units and Canada, with 35 units as her basis of assessment, pays more to the League than any other nation in the western hemisphere.

Activities of the League have been reduced in recent months, and the reason is not hidden. Of the budget of \$7,167,205 twenty per cent. was unpaid last year.—Ottawa Journal.

Dentists Demonstrate

"Mental Anaesthesia" It Was Painless

Dr. Louis Olin, of Boston, extracted a tooth without causing pain or hemorrhage after a patient had been "suggested" into a state of dreamless sleep. The dental treatment was performed before 200 dentists and newspapermen at Swampscott, Mass., in the first public mental anaesthesia clinic in New England under the auspices of the Northeastern Dental Society.

The group watched Dr. Louis Olin, of Boston, extracted a tooth without causing pain or hemorrhage after a patient had been "suggested" into a state of dreamless sleep.

Dr. Olin said he was satisfied and could remember nothing. "I wasn't out long enough to have any dreams," he added.

Carlson said he felt no pain during or after the hypnosis. Dr. Hawkes, who has been experimenting with mental anaesthesia for several years, said he saw no reason why it could not be used in major operations.

"I dislike the word hypnosis," he said. "I prefer to call it anaesthesia. I have no power to compel the patient to perform any act, conscious to him," he said. "If I had, no doctor would think of sending his wife or daughter to me. Sometimes, one patient is more difficult than another, but so far I have failed to find a patient who is not susceptible to methods which for many years have been familiar to psychologists."

Largest Sugar Beet Producer

Until 1932 the United States was third in beet sugar production, but last year passed both Germany and Russia, and now leads the world.

Last year's production was placed at 1,308,000 short tons. Germany was second, with Russia in third place, and France in fourth.

A new war tank has been developed in England that can run on water at six miles an hour and 22 miles on land.

Soviet exports from Black Sea ports continue to decline.

Tea consumed in Great Britain last year totalled 465,000,000 lbs., or 220,000,000 cups every day.

Sales of automobiles in Germany continues to outnumber those of a year ago.

Greatly increased activities at Manitoba's ocean port is anticipated this summer. Twenty-two vessels are scheduled to cover the bay route, unloading import cargoes, and returning to English and European ports with grain. Only ten steamers carried grain out of the port last summer.

With this volume of shipping and resulting freight business at Churchill, an application for a hotel site is expected by the department. Officials believed that hotel owners have been waiting to see how much business the port would have this summer before deciding on applying for sites.

Paint Increases Weight Paris famous Eiffel Tower is 38 tons heavier than it was at this time last year. That is the weight of the paint which was put on its steel surface in the 12 months. Like other buildings in Paris it must, according to city regulations, be painted every seven years, and 1932 was the seventh year. More than 600,000 persons visited it in 1932.

Did't I tell you to go round and re-assure the passengers? "Ay, Sir—and it looks like being a long job."—The Humorous.

ACTRESS POPE'S KIN

Ms. Sandra Ratti, niece of Pope Plus, who is pursuing the career of a film actress in Rome following her winning of permission from the illustrious uncle. However, the Pontiff specified that his niece change her name to Ravel. Her first film was a big success.

Giant Of The Universe

Great Star Arcturus Has Diameter Of 20,000,000 Miles

This, we think, is interesting. "The Century of Progress" Exhibition, now open at Chicago, has its lights turned on by beams from the star Arcturus. Starlight can be caught in a photo-electric cell, thus setting in motion an electric impulse.

In this way Chicago is paying tribute to a giant of the universe, although it is estimated to be 246,000,000,000,000 miles away. We say it is a giant because the diameter of our earth is 8,000 miles, while that of Arcturus is 20,000,000 miles.

Light travels at a rate which would take us around our world about seven times in one second, but men who are well versed in such matters assure us that it took 41 years for the light from Arcturus to reach us.

Arcturus is not difficult to locate. You probably know where to look for the Great Dipper at night, the two end stars in the bowl of which point to the North Star. Follow the last two stars toward the end of the handle in a slightly curved direction, and there you will find Arcturus.—Stratford Beacon-Herald.

The Wheat Question

Acres Reduction, Is Of Peculiar Significance To Western Canada

The Calgary Albertan says: "The question of wheat acreage reduction and control constitutes an important phase of the wheat question of world economic co-operation, and a phase of peculiar significance to western Canada."

"World economic co-operation to be successful must be intelligent; to be intelligent it must be as far as possible, to the areas economically most suitable any given industry."

"Canada—especially western Canada—is an area especially suited to the production of wheat. It should therefore be given every opportunity to produce wheat and to market it, without restriction, in areas unsuitable to wheat production."

"In the case of wheat, therefore, limitation and control of acreage should be rigidly enforced in all countries which have developed wheat production despite unfavorable conditions, and not enforced in those areas such as western Canada, where conditions are favorable."

Blind Phone Operators

About 100 of the blind ex-service men in St. Dunstan's Institution for the Blind hold positions as telephone operators. A. St. Dunstan's man, Thomas Duncan, has been appointed telephonist at the new Hull electricity showrooms.

Tea consumed in Great Britain last year totalled 465,000,000 lbs., or 220,000,000 cups every day.

Exhibits From Prairies

Many Interesting Things Sent To Chicago Fair In 1933

With the world's fair in Chicago, Illinois, one of the topics of conversation these days, it is rather interesting to look back to the World's Columbian Exposition held in Chicago in 1893 and attended by many persons from the prairie provinces. The exposition commenced in April and continued for several months. As is always the case, when exhibits from homes are concerned, the visitors from western Canada looked first for exhibits from Manitoba, Saskatchewan, British Columbia and other parts of Canada before going to see the displays from practically every country in the world.

In the liberal arts building—one of the most magnificent on the grounds—was housed some school work and below the huge sign "Canada" visitors found the North West Territories school exhibit, shipped from Regina.

Kindergarten work from the Regina Union school made an attractive showing in one corner of the booth. Included in this school display were specimens of work from Moose Jaw Union No. 1; St. Albert H.C.P., No. 3; Regina Union School No. 4; Watrous School, No. 57; Regina Union No. 7; Prince Albert Union No. 3; Wide Awake, No. 34; La Comte Sep. School No. 1; Indian Head School; Moonbeam Union, No. 12; and Waseley, No. 25.

Though the educational exhibit was a big feature there were other displays of interest. The provincial government at Regina, acting for the North West Territories, sent a fine showing of fruit. From the experimental farm Indian Head, there was an excellent display of cereals which proved to be quite an attraction and received much interested comment from visitors.

The exhibits from other parts of Canada were none the less interesting. Manitoba was represented by a fine collection of cereals from the Brandon experimental farm. Fruit and fish from British Columbia and fruit from the east coast of the provinces were on display. In the transportation building were to be seen models of steamers sent to the fair by the Canadian Pacific Railway.—G. L. Todd in Regina Leader-Post.

Recipes For This Week

(By Betty Barclay)

FRUIT CARAMELS

1 cup figs.
1 cup seeded raisins.
1 tablespoon candied orange peel.
1 cup stoned dates.
1 cup walnut meats.

2 to 4 tablespoons orange juice.
Steam fruit for 20 minutes. Cool and put through food chopper with walnuts. Moistened with orange juice until of right consistency to make into small balls or squares.

STRAWBERRY TAPIoca

FLAMINGO
1 quart fresh strawberries, hulled.
1 cup sugar.
½ cup quick-cooking tapioca.
½ teaspoon salt.
2½ cups boiling water.

2 cups strawberry juice, drained from berries.
½ cup cream, whipped.
Crush strawberries slightly, add sugar, and let stand 30 minutes or longer. Add quick-cooking tapioca and salt to water, and cook in double boiler 15 minutes, or until tapioca is clear, stirring frequently. Add strawberry juice to tapioca mixture. Chill. Pour ½ of this mixture into parfait glasses. Fold cream into remaining tapioca mixture and fill glasses. Chill. Just before serving, top with crushed strawberries. Serves 8.

Churchill Hotel Sites

Indefinite Time Limit For Applications Has Been Announced

An indefinite time limit on applications for hotel sites at Churchill of Mines and Natural Resources. Previously June 1 had been the last date for hotel applications, but none were received by the department.

Greatly increased activities at Manitoba's ocean port is anticipated this summer. Twenty-two vessels are scheduled to cover the bay route, unloading import cargoes, and returning to English and European ports with grain. Only ten steamers carried grain out of the port last summer.

With this volume of shipping and resulting freight business at Churchill, an application for a hotel site is expected by the department. Officials believed that hotel owners have been waiting to see how much business the port would have this summer before deciding on applying for sites.

Origin Of "Gerrymander"

Word Coined Years Ago During Redistribution Of Massachusetts Districts

The word "gerrymander" is used so frequently by speakers in reference to the Redistribution Bill now being debated at Ottawa that the origin of the word is worth recalling.

When Elbridge Gerry (1744-1814) was governor of Massachusetts from 1810 to 1812, he was largely responsible for a law dividing the state into Senatorial districts which gave the government unfair advantage over the opposition. The redistribution of the districts was made in such a way that the shapes of the towns forming a single district in Essex County, Massachusetts, gave to the map of the district a somewhat dragon-like contour. This was indicated upon a map of Massachusetts which Benjamin Russell, an ardent Federalist and editor of the "Centinel," hung over the desk in his office. The celebrated painter, Gilbert Stuart, coming into the office one day and observing the map, said to Gerry, "That fellow looks like a head, wings, and claws, and exclaimed, 'That will do for a salamander.' 'Better say a Gerrymander,'" growled the editor; and the outlandish name, thus duly coined, soon came into general currency.

Elbridge Gerry became vice-president of the United States in 1813, which position he held until his death at Washington on November 23, 1814. Gerrymander is pronounced with a hard G as the statesman's name was pronounced.—St. Thomas Times-Journal.

School Of Dramatics

University Of Alberta Extension Department Offering Course

Inaugurating an entirely new departure in the field of the drama, the Department of Extension of the University of Alberta is offering this summer for the first time a dramatic school, which will be held at Banff for three weeks, from August 7 to 25. This school has been made possible through the generosity of the Carnegie Foundation, which in 1932 granted the University of Alberta \$30,000 to be spent in three years throughout the province in the furtherance of education and appreciation of the drama. This summer sees the beginning of what is hoped to be a Dominion-wide movement, and that it has set its roots in the west should make all westerners feel justly proud.

The object of the school has been pointed out, and will be attained through instruction in courses such as theatrical design and stage craft, costume and make-up, the art of acting and direction.

Dwarf Had Giant's Courage

Attempted To Walk From Italy To North Pole Alone

Giant's courage was possessed by Anton Gittinger, a dwarf of Milan, Italy, so he decided to walk to the North Pole alone. He went to Norway and got a Polar outfit and dog, then went to Greenland. Eventually his supplies gave out and he killed and ate his dog, only the last one escaping by running away. He was left stranded on the icefields, starving to death. There he was found by the explorer Rasmussen, lying in the snow and too weak to walk. The exploring party adopted the tiny man and nursed him back to life. They kept him with them for the two years of their exploration. At present he is planning a walking trip to Africa, and may later set off for the Himalayas.

Old Books Again Used

Bible and Prayer Book First Used In Australia In 1788

The first Bible and Prayer Book taken into Australia were used at the recent anniversary service in St. Philip's Church, Sydney. The books were carried by the Rev. Richard Johnson when he landed, 145 years ago. Mr. Johnson was the first chaplain of the settlement founded in Sydney Cove by the First Fleet bringing settlers to the new continent. Both books bear the inscription "Botany Bay, 1786," but as the sailing of the fleet was delayed they were first used in Australia on January 27, 1788. Ten years later they narrowly escaped destruction in a fire which burned down the first church.

Railway Registers Increase

Minister Of Railways Sees Signs Of Improved Conditions

It was only \$2,500—one grain of sand on the seashore—but it brought a wide grin of satisfaction to the face of Hon. R. J. Manion, Minister of Railways. That sum represented the gain in the revenues of the Canadian National Railways for the 10-day period ending May 31 over the preceding 10 days.

It was the second time since July, 1929, and the first since October, 1931, the revenues of the government road showed an increase and was construed by Dr. Manion as another sign that old man depression finally was being tossed for a fall.

A new material for dental plates is said to have unusual strength, to retain its form indefinitely, and to have the natural colour of skin tissue.

Work of Daughters Of Empire

Distribution Of Milk To Under-Nourished Children One Of Many Efforts

If the Independent Order of the Daughters of the Empire did no other work in the past year, its contribution to the well-being of the Dominion in supply of milk to underprivileged and under-nourished children would in itself constitute a worthy record.

"It would be impossible to estimate even the quantity of the sum to which this would run," the national convener of child welfare, Mrs. A. U. de Pencier, of Vancouver, said in an interview at Edmonton. "But it is safe to say that nearly every chapter in the Dominion has participated in this form of relief work," she added.

"In one instance in British Columbia, \$27 was spent by three chapters; one of these gave 1,900 quarts a month to school children. Of chapters heard from in the province of Quebec, \$2,254 was expended, one chapter spending \$1,000. In Nova Scotia, there was record of \$1,447 having been spent on milk.

"Clinics are supported in many centres by chapters, and expenses for vaccination and dental work borne where parents are unable to pay for these health services. Preventorium, sanatorium and solatorium maintenance and summer camps are other noteworthy efforts to which the order has devoted itself in the past year," Mrs. de Pencier stated.

Thirty-five cots are maintained in the preventorium in Toronto, and Saskatchewan chapters donated some \$1,000 to preventorium work and have supported innumerable clinics. Seven Vancouver chapters have assisted the solatorium on Vancouver Island, supplying layettes and other clothing and boots and shoes.

"Hot lunches and hospital cars are other phases of child welfare endeavors which have held the attention of chapters across the Dominion during the past 12 months," Mrs. de Pencier concluded.

Mrs. J. H. Holmes, of Saskatoon, a vice-president of the national executive of the Independent Order of Daughters of the Empire, and former provincial president of Saskatchewan, had the distinction of being the only member to receive a national life membership this year.

Ratification of the membership was made at a session of the annual chapter, meeting at Edmonton.

The Lighter Side Of Life

A Little Humor Helps To Make Life Better and Brighter

It is not recorded who first said, "A little nonsense now and then is relished by the best of men." But who ever it was, he might with equal accuracy have observed that a great deal of nonsense is relished at any time by most men. In business or pleasure, a laugh is as hungrily sought as anything else that may be on the programme. The business of living is involved in so many hardships and worries that the most trivial nonsense helps to make life brighter and better. It has been said that a sense of humor is a saving grace; but so too people who have the same sense of humor. Perhaps the best is that which enables one to see enough of the funny side of the experiences of life; tragic as some of them are, to laugh his way through difficulties and to perceive the laughable side of the thing when fate drives him through the briar patches.—Moncton Transcript.

England's Newest Pastime

Writing Words For Favorite Pieces Played On Phonograph Records

A new craze called "Gramo-Poems" has been started in England. It is being fostered by the Gramophone Company, which has been started in England. It is being fostered by the Gramophone Company, which has been started in England. It is being fostered by the Gramophone Company, which has been started in England.

What class? "Inquired the visitor. "You know, Miss Alice is going to be married in due fall" explained the maid, "an' she

HER HAND FELT DEAD

Helpless With Rheumatism

At one time she thought she would lose the use of her right hand. But a blessing—in the form of Kruschen's Salts—put her right again.

"I was sure in a bad state," she writes. "In fact, I could not do my housework. I was so bad with rheumatism in my arms and hands. I could not sleep at night, and had to get up and heat water to ease my pain and numbness. I took all kinds of medicine. I rubbed it and plastered it—but it was still there. I thought I would lose the use of my right hand. I could not hold anything, nor could I see a button on my arm would go dead. I was advised to try Kruschen, and inside of three weeks I found such a change. I have kept on taking it, and am so thankful for the blessings I have received in Kruschen. Now I sleep all night—thanks to Kruschen's help and relief."

(Mrs. J. H.)

The six salts in Kruschen stimulate the liver and kidneys to healthy, regular action; assist them to get rid of the excess uric acid which is the cause of all rheumatic suffering. When poisonous uric acid goes—its deposits of needle-pointed crystals—there's no doubt about those aches and pains going too!

HEART OF THE NORTH

WILLIAM BYRON MOWERY

(W. B. Mowery)

Copyright by William Byron Mowery

CHAPTER XI.—Continued.

Before the spray from the plane's heavy fall had fairly settled, Alan was on his feet, stripping off helmet and jacket, looking back at the flags where the bandits lay hidden and the ready boy where Joy had found a temporary refuge.

For a moment, numbed by this sudden crash of all his plans, he stared hopelessly across that watery thousand yards. The launch was stranded, miles away; Pedneult and Bill were both out of the reckoning; the plane was disabled; the bandits were free to recapture Joy and escape in their canoes. In the space of five minutes his whole venture had come to nothing.

From the handi's covert to the bog where Joy was hiding was a scant two hundred yards. Whatever move he tried, he must act swiftly. In a very few minutes, when those men recovered their wits, they were going to seize their advantage; they were going to whip across, beat through those flags and find her again. She would never flit out of their hands a second time.

Whirling on Buzzard, he demanded sharply: "You can't taxi back there? Can't get me close enough to use the Browning?"

"Can't taxi a foot. Motor's out. They hit something; that's why the engine knocked on us. Think the wire to the timber box is cut."

"How long—us to fix that?"

"Take us an hour."

Even as Buzzard spoke, Alan saw the bandits rise up yonder in the flags and start shoving their canoes into the water. They were going to drag across and recapture Joy.

At the sight of that, his last hesitancy was swept away. Snapping around to the fuselage cubby, he jerked out the frail canvas canoe and unfolded it. Buzzard had been thrusting pliers, wrench and tape into his pockets, but now he stopped and stared wide-eyed at his partner.

"Good Lord! You don't intend . . . ?"

"What else? Stand here and watch them burn her down?"

"Across that open water? Right into their rifles? Them shooting into you from over there? Alan, don't! For God's sake, don't try that!"

Alan jammed the last thwart-prop into its notch, lifted the canoe one-handed down upon the water, flung in the paddle and jumped down upon a float.

"Hand me the Browning and the cartridge wads. Come alive! I don't see you're starting across to get Joy? Why shouldn't I go after them on open water? Larry Young did once. Hand those things down!"

"All right, then," Buzzard gave in. "But if you're going . . . ?" He seized the second rifle which had been Joy's and flung a leg over the cockpit edge. "I'm in on that, son."

Alan fended him back with an arm. "Stay here! That's what I mean! You

can't help—out there. If you'd go, if they'd sink the boat, we'd both be out. Get busy on this plane. Fix it. You've got her rifle to fight 'em away from you. If they put me out of business, you can whip down and get Pedneult and fly over to join Bill. You three can carry it on with them."

He pushed off Buzzard's restraining hand, skinned away from the plane and headed west toward that acre of thick flags where the bandits had been driven to cover.

Pliers in hand but his work forgotten, Buzzard climbed upon a wing to watch the outcome of that fearfully uneven battle.

Alan's goal was a little patch of reeds three hundred and fifty yards from the bandits. It was a miserable place to fight from, when those four rifles yonder would be marling at him from perfect hiding. The patch was merely a few yards square; the reeds, only a couple of feet high, were so sparse that one could see through the clump; and the approach to it across that open water was a gauntlet of death.

But it was all the cover Alan saw, and it was better at least than nothing. The reeds meant that the water there was shallow enough for him to plant the Browning. By paddling up fast with the canoe bow-on, he believed he might get to the flags. Once there, once the Browning leveled into play, he could smother those rifles in a few seconds.

The bandits had been shoving their heavily laden canoes back through the flags to the open water of the pond lying between them and Joy. But when they saw him skimming away from the plane, they stopped and watched him for a few moments until his intention became unmistakable. Alan saw them hold a quick council. And then, as though realizing how deadly that open water stretch was, how impossible to cross in the face of four rifles, they pulled the canoes back and secreted themselves in the flags and coolly waited.

When he was still two hundred yards from the reed patch and nearly six hundred from the bandits, they opened on him. A rifle boomed dully like a caribou Winchester, and his heavy bullet ricocheted off the water a dozen feet to his left.

Alan ducked. A third kicked up smoke at him. A third kicked up smoke a little nearer. Then the fourth, a sharp-cracking Savage, spoke out. Better aimed, in the hands of a deadly marksman, it sent a bullet so close past Alan's ear that he involuntarily winced and bent lower.

The second bullet splintered a hole through the blade of his paddle, uplifted for a stroke. His third, still closer, struck the water between paddle and canoe, ricocheted off, spun edwise and tore through the fat side of the canvas craft, missing the handi's head by an inch. The fourth, elevated a little, sang past in air, harmlessly, but with a murderously close whizzing that jerked a gasp from his lips.

The fifth bullet hit Alan. His left hand felt numb and paralyzed. Glancing down at it, he saw the blood start spurting—falling in crimson splashes upon the white canvas. And then, as though his ring finger, almost completely severed, hung by a mere shred of skin.

With one glance he realized his finger was beyond any surgery to repair. The dangling thing hampered his grip on the paddle. As though its loss was of no consequence in these moments of life and death, he took firm hold of it and pulled it off. The pain came then, in darting throbs that shot to his elbow and made him shiver.

As he gripped the paddle and turned his eyes ahead again toward the thin patch of reeds, he was hit a second time, by the sixth and last bullet of the breed's magazine. For a second he was dazed, so dazed he could not react. He had been thrusting pliers, wrench and tape into his pockets, but now he stopped and stared wide-eyed at his partner.

"Good Lord! You don't intend . . . ?"

"What else? Stand here and watch them burn her down?"

"Across that open water? Right into their rifles? Them shooting into you from over there? Alan, don't! For God's sake, don't try that!"

Alan jammed the last thwart-prop into its notch, lifted the canoe one-handed down upon the water, flung in the paddle and jumped down upon a float.

"Hand me the Browning and the cartridge wads. Come alive! I don't see you're starting across to get Joy? Why shouldn't I go after them on open water? Larry Young did once. Hand those things down!"

"All right, then," Buzzard gave in. "But if you're going . . . ?" He seized the second rifle which had been Joy's and flung a leg over the cockpit edge. "I'm in on that, son."

Alan fended him back with an arm. "Stay here! That's what I mean! You

can't help—out there. If you'd go, if they'd sink the boat, we'd both be out. Get busy on this plane. Fix it. You've got her rifle to fight 'em away from you. If they put me out of business, you can whip down and get Pedneult and fly over to join Bill. You three can carry it on with them."

He pushed off Buzzard's restraining hand, skinned away from the plane and headed west toward that acre of thick flags where the bandits had been driven to cover.

Pliers in hand but his work forgotten, Buzzard climbed upon a wing to watch the outcome of that fearfully uneven battle.

Alan's goal was a little patch of reeds three hundred and fifty yards from the bandits. It was a miserable place to fight from, when those four rifles yonder would be marling at him from perfect hiding. The patch was merely a few yards square; the reeds, only a couple of feet high, were so sparse that one could see through the clump; and the approach to it across that open water was a gauntlet of death.

But it was all the cover Alan saw, and it was better at least than nothing. The reeds meant that the water there was shallow enough for him to plant the Browning. By paddling up fast with the canoe bow-on, he believed he might get to the flags. Once there, once the Browning leveled into play, he could smother those rifles in a few seconds.

The bandits had been shoving their heavily laden canoes back through the flags to the open water of the pond lying between them and Joy. When he was still two hundred yards from the reed patch and nearly six hundred from the bandits, they opened on him. A rifle boomed dully like a caribou Winchester, and his heavy bullet ricocheted off the water a dozen feet to his left.

SOURD ON THE WORLD?—THAT'S LIVER

Wake up your Liver

Many people who feel weak, nervous, and generally unwell, are suffering from a diseased liver. The liver is the largest organ in the body and is responsible for the health of the whole system. If it is not working properly, the body will suffer. The liver is the largest organ in the body and is responsible for the health of the whole system. If it is not working properly, the body will suffer.

Dr. Ferguson said: "The death rate from tuberculosis during 1932 was considerably less than half the death rate among the Indians of the province as a whole. The rate is now seven and a half times that of the tuberculosis death rate of all the people in the province. When it is remembered that at the time the research was commenced in 1926, the tuberculosis death rate was twenty times that of the average of the province one appreciates the reduction that has taken place."

All types of tuberculosis determined during the year under review proved to be human in origin. Bovine tuberculosis was practically eliminated in 1929 by including the Health Unit in a restricted herd area under the Dominion Department of Agriculture Health of Animals branch and it is not anticipated that this strain will be found in future. This phase of the research has been completed.

In spite of the depression, Dr. Ferguson reports, there has been no change in the standard of living in the research area during the past three years.

Almost as Light As Silk and Resists Heaviest Weather

A rainproof material possessed of remarkable qualities has been discovered in Lancashire. The new material, which is made up into hats, coats and gloves, is between the ordinary weatherproof cloth and rubber-finished goods. It is capable of resisting the heaviest weather; it is very light and has a silken finish. Although it can be made almost as strong as silk, it has the advantage of being less susceptible to tearing than the ordinary light mackintosh.

The manufacture began at Burnley to meet the needs of Sir Wilfred Grenfell in his medical and scientific work in Labrador. Since then the material was taken up by the British expedition to Everest. All the suits of the members of the Everest party, their tents, and the capes of the native porters were made from the new material.

Women in Public Life

Do Not Neglect Their Homes To Engage in Public Welfare, Says Speaker

"Are women really making an advance?" was the question asked by Mrs. W. F. Cameron, Regina, national president of the Federated Women's Institutes of Canada, in her presidential address at the joint session of the F.W.I.C. and of the Manitoba Women's Institutes in Winnipeg.

"The speaker assumes women who are interested in public welfare neglect their homes, but that is not so," the speaker said, for they are the very women who are quality conscientious in their home service, with a more efficient method and management."

There has been real progress in regard to the home, Mrs. Cameron declared, but in spite of this new condition, this comparative freedom from constant toil, many women are still willing to be engrossed entirely in domestic details.

Only Austrian Ship Afloat

The S.S. Wien of 4,900 tons claims the distinction of being the only ship afloat belonging to Austria. It sails between Alexandria and London, carrying cotton seed, oil, cattle, and onions. The Austrian Legation at London, England, states that it knows of no other vessel owned by Austria, now in commission.

The world's hardest metal, osmiridium, which is used for tipping fountain pens, is found in Tasmania.

It requires about 55 different machines to produce well shoes.

About 400 varieties of daffodils are now being grown in British Columbia and the number is steadily increasing.

"Make a sentence containing the word 'omnivorous'."

"Omnivorous happy as when I'm playing football."

Italy now has 1,328 miles of electrified railway lines.

Combating Tuberculosis

Effective Results Reported In Work On Indian Reserve

The lowest tuberculosis death rate ever recorded in the Qu'Appelle Indian Reserves of Saskatchewan was reported in the Indian Health Unit there during 1932. This is less than half the death rate from this disease that obtained prior to the institution of a special project to effect reduction. Dr. R. G. Ferguson has reported to the National Research Council's Associate Committee on Tuberculosis.

Dr. Ferguson said: "The death rate from tuberculosis during 1932 was considerably less than half the death rate among the Indians of the province as a whole. The rate is now seven and a half times that of the tuberculosis death rate of all the people in the province. When it is remembered that at the time the research was commenced in 1926, the tuberculosis death rate was twenty times that of the average of the province one appreciates the reduction that has taken place."

All types of tuberculosis determined during the year under review proved to be human in origin. Bovine tuberculosis was practically eliminated in 1929 by including the Health Unit in a restricted herd area under the Dominion Department of Agriculture Health of Animals branch and it is not anticipated that this strain will be found in future. This phase of the research has been completed.

In spite of the depression, Dr. Ferguson reports, there has been no change in the standard of living in the research area during the past three years.

Almost as Light As Silk and Resists Heaviest Weather

A rainproof material possessed of remarkable qualities has been discovered in Lancashire. The new material, which is made up into hats, coats and gloves, is between the ordinary weatherproof cloth and rubber-finished goods. It is capable of resisting the heaviest weather; it is very light and has a silken finish. Although it can be made almost as strong as silk, it has the advantage of being less susceptible to tearing than the ordinary light mackintosh.

The manufacture began at Burnley to meet the needs of Sir Wilfred Grenfell in his medical and scientific work in Labrador. Since then the material was taken up by the British expedition to Everest. All the suits of the members of the Everest party, their tents, and the capes of the native porters were made from the new material.

Women in Public Life

Do Not Neglect Their Homes To Engage in Public Welfare, Says Speaker

"Are women really making an advance?" was the question asked by Mrs. W. F. Cameron, Regina, national president of the Federated Women's Institutes of Canada, in her presidential address at the joint session of the F.W.I.C. and of the Manitoba Women's Institutes in Winnipeg.

"The speaker assumes women who are interested in public welfare neglect their homes, but that is not so," the speaker said, for they are the very women who are quality conscientious in their home service, with a more efficient method and management."

There has been real progress in regard to the home, Mrs. Cameron declared, but in spite of this new condition, this comparative freedom from constant toil, many women are still willing to be engrossed entirely in domestic details.

Only Austrian Ship Afloat

The S.S. Wien of 4,900 tons claims the distinction of being the only ship afloat belonging to Austria. It sails between Alexandria and London, carrying cotton seed, oil, cattle, and onions. The Austrian Legation at London, England, states that it knows of no other vessel owned by Austria, now in commission.

The world's hardest metal, osmiridium, which is used for tipping fountain pens, is found in Tasmania.

It requires about 55 different machines to produce well shoes.

About 400 varieties of daffodils are now being grown in British Columbia and the number is steadily increasing.

"Make a sentence containing the word 'omnivorous'."

"Omnivorous happy as when I'm playing football."

Italy now has 1,328 miles of electrified railway lines.

Rainstorm Was Mystery

Incident Of Southern Saskatchewan Shows How Farmers Have Suffered

A child who is three years old and lives in Southern Saskatchewan, has the experience, this spring, of seeing the first rain that had occurred during her life. She thought that someone was throwing water on her. The rainstorm was a mystery that had to be explained by older people and the incident is illustrative of the privations that have been endured by some residents of parts of the Canadian West where drought has exacted a heavy toll upon farmers and business people.

Happily in most parts of Canada such a thing as a serious shortage of moisture is unknown. The rain and fair weather supply the moisture so necessary to comfort and profit. Those so favored cannot adequately estimate the seriousness of a situation that leaves a large part of the country without precipitation for three years, the loss of crops, starvation suffered by animals and human beings, the appearance of desolation that settles down upon an area so afflicted. There ought to be sincere sympathy with such people and when the call to aid them comes it ought to be responded to with enthusiasm by those whose lot has been cast in an environment where the meekness has never been seriously jeopardized.

World's Largest Dam

Immense Artificial Lake To Be Created In Nevada

Construction of the world's greatest dam was started in Nevada recently.

Without ceremony the pouring of concrete into the river bed foundation for Boulder Dam began. For more than two years this pouring—7,000,000 tons in all—will continue. This will rise a vast concrete structure, 730 feet from the foundation rock, and sufficiently high to raise the height of the Colorado 952 feet to create the greatest artificial lake man so far has set out to build.

August 1, 1935, is the date the dam will be finished. It will be 1,180 feet across and will require 5,500,000 barrels of cement in its construction.

Noisy Northern Lights

Aurora Borealis Makes Hissing Sound In Northern Skies

When the aurora borealis flings its gorgeous draperies across the northern Canadian sky it is audible, according to C. S. Beals, astronomer of Victoria. In a paper read before the fifth Pacific Science Congress at Vancouver, Mr. Beals confirmed what many who have lived in the north lake for granted. He declared that in an extended analysis of observations made by residents of northern Canada, nearly 150 persons reported having heard the auroral sound.

They describe it variously as a hissing, swishing or rustling sound. Mr. Beals said, and reports agree with those going back into history of the north to the time of Samuel Hearne in 1797.

Mayor For Sixty Years

M. Leon le Corneur, Mayor of Plourhann, in Brittany, who died recently in his hundredth year, it developed had been Mayor of his town for sixty years, believed to be a world record. He was re-elected thirteen times. He actively carried on his duties until a few days before his death.

A Lengthy Law Suit

A lawsuit which lasted 900 years has been settled in the court of appeal in Rome. It concerned a common to which two Italian parishes, Casavert and Vicoli, both laid claim. Neither would budge in its stand until recently, when a compromise was effected.

Second-hand Car Salesman (on trial ground): "This car is sound in every part."

Prospective Buyer: "So I hear."

Little Helps For This Week

"Search me O God, and know my heart; try me and know my thoughts; and see if there is any wicked way in me, and lead me in the way everlasting."—Psalm 139:23, 24.

Save us from the evil tongue. From the heart that thinks wrong. From the sins whither they be. That divide the soul from Thee.

Such are our sinful habits, thoughts, such also will be the character of thy mind; for the soul is dyed by its thoughts. Dye it then with a continuous series of thoughts such as these:

"Where a man can live there he can live well; for if he must live in a palace, he can also live well in a palace."—Marcus Antonius.

Who is there that sets himself the task of steadily watching his thoughts for the space of one hour, with the view of preserving his mind in a simple, humble, beautiful condition, but will speedily discern in the self-reflecting, self-admiring emotions a state as much opposed to simplicity and humility as night is to day.—M. A. Kelly.

They Take Bridge Seriously up North

The Balkans went to war again over a bridge table in the Edmonton Greek Club the night of June 20 last when Steve "Kibitzer" Dimitroff, a Bulgarian, had his car bitten off by Chris "Small Slam" Collas, an Albanian who paid a fine of \$10 rather than go to jail for 90 days, after Magistrate Ool. George B. McLeod had found him guilty Monday morning of assault occasioning actual bodily harm.

Three witnesses presented the setting of the epic battle to the court. Collas was playing East with Bando Miednarkoff having lead at South. Two games had gone. The rubber and the spoils of war were at stake as the players entered the lists for the third and crucial game. Eleven cards had been led and eleven tricks had gone to Collas, who was shooting for a small slam. He led the paste board number 12, seemingly a sure fire trick and South trumped, which was a cue for the Kibitzer, who had been peeking at the hands to enter the bridge battle.

"No, no," cautioned the back seat driver, "slough on that and trump from the dummy."

South did just that, winning two tricks and doing Collas out of the small slam.

"That made me mad," Collas confessed, "and I lost my head."

"Sure," returned the prosecutor with a fine show of sarcasm, "but the Kibitzer lost his car. How do you explain that?"

Dr. Clyde Macdonald testified that a strip of flesh and cartilage, one-half an inch wide, had been torn off the length of Dimitroff's ear.

"It was torn right off," said the medico. "He brought it up but we had to toss it in the slop pail."

Dimitroff told of being chased around the club by the irate Collas and dodging wine glasses, one of which crashed through a window. Collas came right back to tell of ducking flying chairs thrown at him by the complainant.

"He was doing that all right," explained the accused. "I told him to shut up and it didn't do any good. It was most annoying."

"I understand how it would be," replied the court. "You certainly had provoked him. But an act such as this, biting part of a man's ear off, might cost you three years. You will settle the medical bill, pay the costs of the court and a fine of \$10."

LEGAL BEER REDUCES ARRESTS IN U.S.A.

Los Angeles, June 19.—Since the advent of legal beer and wine, April 7, drunk driving in Los Angeles has fallen off 60 per cent, the district attorney's office announced.

"KING'S VACATION" AT THE AVALON

Florence Arliss, wife of the famous stage and screen star, George Arliss, plays opposite her husband as his queen, in his latest Warner Bros. picture, "The King's Vacation," which opens at the Avalon this week. This is the third time his wife has played with him on the screen, having appeared before in "Disraeli" and "The Millionaire." She will not consent to play any role in his pictures except that of his wife and a love story that has a happy ending. When the role calls for some other ending or another sort of characterization, another actress is invariably engaged for the part.

Mrs. Arliss appeared frequently with her husband on the stage, but only the three times on the screen. Before her marriage she played on the stage independently as Florence Montgomery, "the girl with the nice arms," as Mr. Arliss describes her in his autobiography.

"The King's Vacation," is an unusually pleasing comedy drama with a delightful romance, written by Ernest Pascal, author of "The Marriage Bed." There is an excellent cast, other players being Dick Powell, Patricia Ellis, Dudley Digges, O. P. Heggie, Marjorie Gatenon, Vernon Steel, James Bell and Maude Leslie.

Coming: Zane Grey's "Mysterious Rider," July 6, 7, 8.

Joe E. Brown in "You Said A Mouthful," July 13, 14, 15.

Show starts Thursday and Friday at 8:30; Saturday 7:30 and 9:00.

TOWN NEWS

Looking out of their windows on Monday morning, citizens of the town thought winter was here once more. Large flakes of white from the public air blowing around and the landscape had every appearance that a blizzard was in progress. No doubt many people rumaged around under the basement looking for their overcoats or began to dig their fur coats out of the cedar chest before they realized it was only cotton from the trees.

The stores of Lacombe will be closed all day Saturday, July 1st, Dominion Day. For the convenience of the public, all stores will remain open on Friday evening.

Bernard S. Scher, of Innisfail, was instantly killed on Saturday evening when the truck he was driving was struck by the north-bound express on a crossing.

Thieves once again raided the Bentley Co-Operative Store on Friday last, and secured some \$80.00 in cash. The police are working on the case.
